RATIONALIZATION Takes Up Work Started CALLED KEY TO by Reich Foreign Minister UNITED EUROPE

Old Hit-or-Miss System Must Yield to Measures of Mass Production

14 POLISH FIRMS COMBINE AS UNIT

German Chemical Trust Methods Have Always Insured Profit Even in Depression

Because of the growing interest in the proposal for a United States of Europe, The Christian Science Monitor has arranged for a series of articles on the subject from the pen of a competent observer. The articles cover many phases of the subject and provide the groundwork for an understanding of the reasons for the appearance and power of the whole movement. The fifth article appears below.

COPYRIGHT 1929 BY THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

By PAUL HUTCHINSON GENEVA—The change that has come over Europe in the last decade is well illustrated by the progress of the rationalization movement. To the casual observer, rationalization will eem to affect only Europe's industrial life. But as a matter of fact, the adoption of rationalization by European business men indicates a fundamental change of attitude, not only in industry, but through Euroean society as a whole.

In the years before the war a

large portion of the industry of the Continent was conducted on what seemed to outsiders as a much too thumb basis. Industrial organizations even the best of them-were weighted down with family connections, pensioners and other persons whose contribution to production was hard to discover. Selling methods seemed to be largely a unforeseen happenings occur.

It must not be forgotten that the and social connection. And if the out-

grading scope for his activities. No longer is he content to have the industries in which his funds are invested run on haphazard and antiquated lines. Instead, he is insisting that the latest methods of industrial what the experts accomplished at the latest methods of industrial paris. It is practically impossible for trial practice, whatever their origin, Germany to deviate from this course. shall be applied to European conditions and firms. The European investor is just as intent on wringing the last possible pfennig of profit out of his present-day industries as is any American efficiency engineer. And his insistence has produced

Organized Trade Urged to Combine Against 'Rackets'

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR OKLAHOMA CITY, Okla.-Pointing to nation-wide publicity, designed to develop business civic conscious- the German People's Party in the fourteenth session of the American Plan Open Shop Conference here declared this form of crime a menace to American industry and urged that

it be checked at once.

The conference indorsed the plan of attempting to combat "racketeering" by establishing a movement among the 125 businesses now affiliated against all infringement of constitutional rights. Increasing business loss due to "rackets" in the last six months was detailed by Joseph Nielson of the Chicago Employers' Association, Pierce E. Wright of the Association, Fierce E. Wright of the Detroit Building Trades Employers' Association, and C. W. Hink of the Shreveport Open Shop Association.

Growth of mutual cordiality be-

tween employers and employees is a pronounced trend in American industrial relations today, according to A. C. Rees, conference chairman. Forward movements which are bringto the country are introduction of group, insurance, improvement of physical working conditions, and the grievances and be assured fair treat-

ment, it was said. Representatives of nearly half the states reported a rapid spread of the open shop movement and healthy business conditions in practically

DR. JULIUS CURTIUS

STRESEMANN POLICIES ARE TO BE CONTINUED

His Successor, Dr. Julius Curtius, Is Supporter of His Views

BERLIN-Dr. Julius Curtius has become temporary successor to Dr. Gustav Stresemann. He is as stanch a supporter of an international rapprochement and the fulfillment policy—that is, a policy of fulfilling Germany's obligations-as Dr. Stresemann himself. Dr. Curtius was Dr. personalized, lackadaisical, rule-o'- Stresemann's personal friend and knows his intentions. Thus the most important foreign political task before the Government, that of the conclusion and ratification of the Young plan, will be brought to a successful the historical differences and weld end with practical certainty if no the nation into an indivisible whole.

JUGOSLAVIANS MOVE TO WELD UNIFIED STATE

Kingdom of Nine Provinces Formed to Supplant **Triune Nation**

BY RADIO TO THE CHRISTIAN SCIENCE MONITOR BELGRADE-The name of the Kingdom of the Serbs, Croats and the Slovenes has been officially changed to Jugoslavia by a new law just published here. The state has been divided into nine provinces with governors who are called "Bans." This previously was the title Croatian governors.

Great interest and a favorable imression was evoked in the capital by the change. Those here who favor a united Jugoslavia and not tribal union consider the enactment of the new law as a great step toward the settlement of internal problems.

They have avoided all crises hitherto and have thus paved the way for the progress, which has been made dur-ing the last 10 years. The previous name of the kingdom signified sepa-rateness and inequality, while the present name symbolizes unity and equality. The division into provinces follows the natural frontiers and is intended to simplify the problem of

The purpose of the new law is to reduce friction among the antagonistic provinces. It establishes nine main districts which bear the names of the larger rivers and are centered about leading cities. All the traditionally national names such as Macedonia, Montenegro, Slovenia, and Croatia are eliminated. Each new administrative area is called a Banstvo and the Ban will be a delegate of the royal dictator and sweeping power. Belgrade will not be the center of any Banstvo but will remain the capital of the nine prov-

Thus by new nomenclature and a new administrative partitioning the dictatorship hopes to submerge all of cise of which they shall be able to convert strong local loyalties into a higher common loyalty to a central authority. It is predicted that the Croats will view the new measure only as an attempt to impose Serbian only as an attempt croats will view the new measure only as an attempt to impose Serbian domination and authority over the whole state and over all the other nationality groups. The success of the new nationalization scheme is expected to depend in no small measure upon Jugoslavia's ability to deal with the description of the projects under hand at the laboratories of the with the dissatisfaction in the non-Serbian groups.

standing was not mixed up in this difference of view, there was no likelihood of hostility.

That misunderstanding should not enter the relations of the two countries, Mr. MacDonald believes, is an important responsibility of the press. He appealed to the American press understanding as a fundamental to

The degree of importance that he attaches to this making impossible the interjection of misunderstanding in disagreements is evidenced, Mr. MacDonald declared, by the fact that

he considers it the primary object of his coming to Washington. He, too, stressed the point that there was no intent of making any agreement or pushing any arrangement. In almost identical words Mr. Mac-Donald emphasized that it is only the

tween him and Mr. Hoover. And in doing so the purpose is the furtherance of peace, peace not only league for the leadership in profes-between the United States and Great Britain but among all the nations. The British Premier grasped the What lasting value, he argued, can there be in a peace between two great nations if such an arrangement leads only to hostilities and enmities

Risks for Sake of Peace

to bring it about, the same as risks peace in terms of war, so long shall there be wars and not peace. If international relations are thought of in terms of peace Mr. MacDonald as-serted his faith and confidence that there would be peace.

America, he said, was blessed be-

yond words by being situated as it was. And being thus removed it was fitting that the Kellogg pact should originate from it. And having given the world the anti-war treaty why should not the world go on and give peace a chance by making the pact

As was done by the spokesman for the American Government so Mr. MacDonald stressed the point upon his press listeners that it was of vital importance to the success of this venture in peace that other nations should not come to view his journey as something that held out concern and danger to them.

It would be nothing less than a tragedy, Mr. MacDonald explained if with the United States and Great Britain, in getting closer together

PREMIER VOICES FAITH IN IDEALS OF PARIS PACT

Enlists American Press in Cause of Peace - Denies Any Thought of Alliance

WASHINGTON (AP)-Prime Minister Ramsay MacDonald of Great them As their special train made its Britain in receiving the American way to Washington it was met every- and foreign newspaper correspondents at the British Embassy, said:

> "I am very pleased indeed to see you. There is one thing that is uppermost in my mind and I should like

"It has been very touching to me and it is almost impossible for me to put into words how grateful I am for the warm as well as friendly re-ception which I have received all ong the line of my route. I am sure that my daughter will say exactly the same when she sees you

"Of course this is not my first visit to America. I always knew that your people were warm-hearted, but the proof they gave me has been very touching indeed and I think that the people of Great Britain when they read about it will understand and appreciate it. They will know that it means that the reception given to me was really a reception given to them through me as their represen

"I would like to assure you on an other point. That is that I am here especially, do believe me, my American friends, I am here not as a party leader at all. I am here as represent ing the whole body of public opinion in Great Britain. Their desire for cordial friendship with your people is very great and very profound and they are praying, the have been praying for weeks since they knew that this visit was likely to take place, that a way might be found to bring them in heart and in spirit closer and closer to your people here.

No Thought of Alliance

"Do not make any misunderstanding about that because I see that to do. I hope that as a result of our sometimes it is said elsewhere that either one or other of us have the position that she does not require In the sunlit plaza outside was a to consider anything in the nature of of diplomacy.

"What we want, and I believe wha

your people have shown that you want, is just understanding, and if I might appeal to the American press, I should appeal to them in this way. You have a tremendous power in your hands to remove misunderstanding. We do not always see eye to eye, and I dare say you often find admirable reason for criticizing us and for disagreeing with us, and all agreement never be aggravated by misunderstanding. The trouble in the world today, everybody who has been Foreign Secretary, and who has been concerned with foreign relations, will tell you, the trouble is misunderstanding, and the great purpose, the main purpose, of my visit to Washington is to make misunderstanding

impossible.
"Neither your President, I believe, nor myself—I can certainly talk for the going into wars. Isn't it time, my friends, that we should take some risks to secure peace? As long as we

"As soon as we think of internawith the determination to maintain peace, then I have got the belief and the faith that we shall maintain peace. There is nothing that is more inimical to a final establishment of peace than a mentality which assumes that you have got to prepare

tween America and Great Britain Sofia Lays Railway should be at once followed by re-moval of other misunderstandings with or between other nations. We have no exclusive ideas in mind at all

"I think that is sufficient to give you a general idea of what we hope and still more cordial relationship between our two countries, and i that happens I shall go back a very contented and a very happy man."

Text of Scroll Presented

by New York to Premier NEW YORK-The scroll presented by this city to Prime Minister Mac-Donald at City Hall read as follows:

To The PRIME MINISTER OF GREAT BRITAIN, GREETING.

The people of New York City are so happily situated that it has often been their honor to be the first to extend hands of cordial welcome to many of those visitors from the Eastern Hemisphere who pass through this hospitable seagate. Other proud cities, other states of our great continent, will greet you, Sir, with the acclaim due to an bonored guest from overseas, but nowhere will you find the voices of so many millions of people of many races raised in heartfelt and genuine lcome to you.

Rt, HON. JAMES RAMSAY MacDONALD, P. C.,

Prime Minister of Great Britain. It is my privilege as Chief Magistrate of New York City to be the voice of our people in greeting your advent to our metropolis, the first Prime Minister of your country to come from Downing Street to the Inited States.

To the minds and hearts of our free people you stand, Sir, as sym-bolic of a great change in the world's thought—that thought which seeks to discard the meretricious glory of armed force, for the more beneficent

armed force, for the more beneficent glory of a world at peace. It is your proud, right today to hope that the philosophy for which you have striven and for which you have lived, is possibly on the threshold of being transmuted into action.

The chosen leader of the British people, you have proved your right to leadership, by your faith in democracy and by the courage with which you have thrown off diplomatic restraints. You have created your own precedents, even as 158 years own precedents, even as 158 years ago the first man to hold your high office, Sir Robert Walpole, created precedents which have solidified

your Empire.

In order that you may have a permanent token of the high honor and esteem in which our people hold you, I have caused to be prepared this

SCROLL OF HONOR. SCROLL OF HONOR.

May it stand to you as a symbol of the kinship of feeling which you have cemented by your deeds, and glorified by your fine spirit.

And that this is the welcome of all our people, I am glad to certify by affixing to the document my signature as Chief Magistrate of the City and the Official Seal of the City of New York.

JAMES J. WALKER, Mayor of New York City.

GERMAN TRADE BOARDS INDORSE THE YOUNG PLAN

Say Rejection, and Continuance of Dawes Pact Would Bring Crisis

T RADIO TO THE CHRISTIAN SCIENCE MONITOR BERLIN-One of Gustav Stresenann's greatest achievements, which he was so violently attacked by his opponents—settlement of the reparation question by the Young convention of German chambers of commerce and industry.

When weighing without bias the advantages and disadvantages of the Young plan, one cannot but acknowledge the improvements which the Young plan shows as compared with the Dawes agreement, Dr. Melchior, German economist, declared. If the Young plan were rejected by the German people, he continued, then the Dawes pact, with its higher financial burdens, its foreign control, its pledges, would stay in power; the third Rhineland zone would remain occupied and Germany's foreign political situation would become most unfavorable while the nation itself would be heading toward an economic

This statement before so compe tent a body of business men is of special importance at the present time when the Nationalists are tryhostel in Britain, organized by the ing to incite the German people against the Young plan, describing it as of greater danger than the Dawes pact. Dr. Melchior warned against regarding the Young plan as a satisfactory solution, as nobody knew whether, and for how long it could be executed, but of the two evils-the Dawes and the Young plan it is the smaller.

In the discussion which followed the opinion is said to have been gen-Young plan and war guilt charge.

NORTH CAROLINA LEADERS OPPOSE FEDERAL ACTION

Senators Overman and Simmons Insist Situation Is Clearing Up

SPECIAL FROM MONITOR BUREAU

WASHINGTON-Senate debate on conditions in southern textile mills centered particularly on recent riots at Gastonia and Marion, N. C. Burton K. Wheeler (D.), Senator from Montana, urged unanimous consent to adopt the majority report of the Committee on Manufactures for an inquiry by the Federal Trade Commission and Tariff Commission. His proposal followed an appeal to the Senate by William Green, president of the American Federation of Labor.

The demand was opposed by Lee Overman and Furnifold M. Simmons, the two Democratic Senators from North Carolina. "The situation in the South is get-

ting worse," Mr. Green's telegram said in part. "I appeal to the Senate months ago, providing for an investi-

"The whole situation is one practically seething with revolt," insisted from military officers, one has come Mr. Wheeler.

"It is all coming along all right; satisfied," said Mr. Overman.
"If conditions in North Carolina are as rosy as the Senator suggests,

"They do," said Mr. Overman. "At the proper time and when all the trouble is over, let the Federal Trade Commission go down there and investigate the situation.

Why not agree to it now?" "Because people are going down into North Carolina—Communists and Bolsheviks—stirring up all this trouble," insisted Mr. Overman, Later "sowing seeds of revolution" in his

recent Labor unrest in the South to Communistic activity but he took no stock in arguments that the 12-hour day, and wages of \$12 a week for a -hour work week for men, women and children, had anything to do

"It was the result of a quarrel between Labor, involving questions of closed and open shop and the right of labor unions to control em-

ployment."
That, according to Mr. Simmons, was all there was to it.

Abolition of Appeal to Privy Council to Be Urged at **Coming Conference**

SPECIAL TO THE CHRISTIAN SCIENCE MONITO DUBLIN-The Free State promises to earn the reputation of being the "enfant terrible" of next year's Imperial Conference, judging from the many important matters which Patrick McGilligan, Minister for External Affairs, is busy preparing for the consideration of the preliminary committee of experts.

Mr. McGilligan declared recently

the Dail that the conference would be called upon to remove the Statute Book of the United Kingdom and to sweep away the last vestiges of the organization, now superseded, which are inconsistent with the existing legislative powers of the member-State Parliaments.

Seek Abolition of Appeal

The Free State representatives are recognized as an unsatisfactory posi-briefed to secure the abolition of tion of affairs, and according to a the right of appeal to the Privy statement made by Mr. McGilligan in Council—a right held by citizens of the Senate recently, the Free State member-states to petition the King Committee of the Privy Council Court of a Dominion

State Ministers are determined to less and less."

mash. They maintain that the claim of the Privy Council to exercise su-preme jurisdiction over the courts of the Dominions constitutes a restricion of Dominion sovereignty, and, while William Cosgrave's Cabinet does not reject the idea that there should exist a court of appeal for the Commonwealth as a whole, they contend that the Judicial Commit tee of the Privy Council lacks the qualifications necessary to discharge this important function.

There is little doubt, however, that the personnel of the Judicial Committee, including as it does Lord Carson and other Conservative politicians consistent opponents of Irish self-government, has also contributed to the Free State Government's attitude of hostility in this at the Boeke International Confermatter of the right of appeal to the King in Council.

Decisions Annulled

Since the 1926 Imperial Conference two appeals to the Privy Council were submitted from the Free State-known as the Lynam vs. Butler and the Wigg-Cochrane cases. Unfortunately in both instances complications ensued of a nature which did not tend to improve the prestige of the Privy Council in the Free State, whose Ministers promptly resorted to the highly undesirable course of introducing ad hoc legislation for the purpose of nullifying the Privy Council's decisions.

From every point of view this is recognized as an unsatisfactory posirepresentatives at the Imperial Conagreement to "get rid of the prealternative, let it stand, with an un-This is one of the last remaining derstanding that appeals to the links with the Crown which the Free Privy Council would tend to become

METROPOLITAN OPERA MAY RISE IN MODEL BLOCK

New Plans for Rockefeller Project in New York to **Speed Construction**

NEW YORK-Selection of engineers to supervise the development of the combined cultural center and model retail and business area, proected in mid-town Fifth Avenue by

sed that the corporation had been formed by Mr. Rockefeller last to direct the development which is expected to include the construction of a new Metropolitan

Colonel Woods announced that the Todd, Robertson Todd Engineering Corporation would be one of two engineering firms to be retained. It is headed by John R. Todd and directed the construction of the Graybar building, the Barclay Hotel and other large New York structures. The other firm is Todd & Brown, of which Webster B. Todd is the president. This organization is now engaged by Mr. Rockefeller in the restoration of Williamsburg, Va.

With the purchase fast January from Columbia University of a leasenewals, negotiations with the Metropolitan Opera and Real Estate Company to place its new building on a site within the holdings were begun.

No agreement has as yet been owner's belief that the proceeds from ing the the sale of the present opera house ters of 12 weeks each. would be less than the cost of a new building on the Rockefeller site. Colonel Woods' announcement, however, was held to indicate confidence that a contract would be made and th t, even if it were not, the major ect would proceed.

If the opera house is included in the plans, it is to face east on a terraced square, 200 feet by 200 feet, and run back toward Sixth Avenue. This will be called Metropolitan

"Negotiations for the erection of a new Metropolitan Opera House on property are progressing," Colonel Woods said, "and it is expected that the opera building will be the center of a comprehensive development in architectural harmony with it."

The arrangement with the two engineering firms indicates an early beginning of actual construction work on the so-called Rockefeller City, covering 11 acres between Fifth and Sixth Avenues and Forty-ninth and Fifty-ninth Streets, some of the most valuable property in New York. The work will require the razing of old buildings, the cutting through of new streetways, the planning of a park, the possible erection of second-story widewalks and other features.

The builders estimate that the new Rockefeller project will be completed in from six to eight years.

cannon which had lately come into use. Not long after he had passed on, his military foresight was justified. Legend of the Soup Kettle

Legend has it that the cackling of alarmed geese once saved Rome. Geneva has quite as picturesque a story of the way in which the city was saved from the assault of a Duke of Savoy, who sought to take the town for his own profit and for the re-establishment therein of the Ro-

man Catholic religion.

A solemn treaty stood in his way, but that he disregarded. The walls built by John Calvin offered a more whotever in the calculation in the calculation of the calculation. was in a fair way of overcoming when an untoward mischance brought disaster to all his plans. It was the dead of a December night and the Duke's soldiers were stealing across the fields before the city's walls. They carried long, hinged ladders which they laid against the parapet and began to climb. But a slight noise alarmed, not a sentry but a woman making soup in her house or the wall. Peering from her window, she saw the head of a soldier rising over the battlement. The zeal of a patriot overcame the pride of the cook. Instantly, she poured the contents of her soup kettle upon the luckless invader and followed it with the pot itself. The clamor, her cries, and the walls of the assailants aroused the garrison, and the enemy was driven off.

That was in 1602 and Geneva has never since been in danger of an armed assault. Today in the museum you may see the scaling ladders, dark lanterns and weapons of the vanquished foe, though the historic soup kettle is lacking. Yet this lack is made up annually on Escalade Day, when chocolate caldrons of every size filled with flowers are on sale in the shops, and the holiday is kept with high carnival.

of the founding of the Republic on Oct. 5. President Carmona reprieved sentences of 114 criminals and reduced the sentences of controller, and duced the sentences of deserving prisoners.

Assistance was asked of the rail-fact, practically every musical infact, practically every m Wall of Remembrance

tolerance.
The Wall of Remembrance, the giner people of Geneva call it. Against the heavy background of an earthen rampart some 30 feet high is set a panel, perhaps 100 yards long, of stone, against which stand huge stone figures of the ruling spirits of the Reformation. Four figures are colossal, reminiscent of the great stone sculptures of the Egyptian deserts. They represent Calvin, John Knox, Farel, the inspired preacher, and Beza, who was Calvin's successor. A stern-faced, dominant group they are made to appear, the intellectual pre-decessors of Henry Kitson's famous Puritan, which stands so impressively fronting the green at Salem, Mass. The record of their times shows that they had need of all the intellectual and physical strength which the sculptor has emphasized, for this little group set themselves squarely athwart the purposes of the Church of Rome, and set the example which saved Protestantism in England, in Holland and in the United States. It gives one a thrill to stand today be fore the Wall of Remembrance and to reflect how close were the intellec-tual and spiritual ties that bound that little band of French and Swiss to the Pilgrims who landed on Plymouth

of liberty makes it peculiarly accep-table as the capital of the League of coping with the gunpowder and generall good of the colonie."

By the side of this panel stands the statue of Roger Williams, who best perhaps of all the early bands of American pioneers typifies religious liberty and civil justice.

I can imagine no way in which one can get a better idea of the world wide sweep of the Reformation, and its wholly logical connotation of civil with religious liberty than by the study of this monument. History, as taught in the schools, is too often a lifeless, a meaningless thing. Here one catches the thread of in-

When on a sculptured record such as this one sees the doughty form of Cromwell side by side with that of William the Silent, John Knox, of William the Silent, John Knox, the Duke of Brandenburg and Stephen Bocskai, who declared in words now sculptured beneath his effigy, "The independence of our faith, our liberty of conscience and our ancient

In a sense, the rationalization

of the steamer, and other prominent the number of workers required. German Steel Trust

> from that followed in coal. It really began with the formation of the great steel trust, and the rationing of S. Dennison are largely interested. the new ope supplies obtained, in large degree from Spain and Sweden, to make up for those lost as a result of the war. Plants were combined, overlapping production in different plants was eliminated or greatly reduced, inefficient equipment was scrapped, certain plants were set ized, manufacturing centers were shifted in order to give the closest possible relationship either to materials or markets, or both; technical improvements in manufacturing processes were constantly sought, and when discovered were introduced, no matter how new the machinery thus thrown out; sales organizations were unified, a common buying organization was set up; wages have gradually gone up.

Although it is not in the trust; the great Krupp plant at Essen gives a graphic illusutration of rationalization in the German steel industry The peace treaty put an end to Krupp's most profitable business; the French invasion nearly put an end to the entire business. By 1926 the num ber of workers employed had fallen from more than 40,000 in 1920 to only 18,000. And at the same time it became apparent that several of the lines of manufacturing which had been undertaken to replace the old munitions making would not return

a profit.
Drastic rationalization was therefore adopted. This began in the Krupp coal mines, where the installation of the latest machinery, new coking plants, and the utilization of byproducts quickly reduced labor costs. Pig iron production was concentrated in the most efficient furnaces, which were given the most modern equip-ment and methods of handling. Older steel furnaces and buildings at Essen were scrapped; the new lines of manufacture that were not paying were

labandoned; working costs were reitems. The result was that Krupps was again employing more than 40,600 men by the end of 1927, and the firm's prosperity seems assured.

Methods of Chemical Industry The rationalization of the chemical industry presents much the same story. Here, again, there had been loss of markets due to the war, and the appearance, under war stimulus, of competition in other lands that would make the re-establishment of the pre-war monopoly in certain chemical products impossible. However, the closely organized German chemical trust set about re-creating its markets with confidence, believ ing that, by the perfection of former processes and the discovery of new it could secure for itself a place as stable as that held before the war. While there has not been as much publicity concerning the methods employed-secrecy seeming to be in separably connected with chemical processes-it is known that there has been the same elimination of un profitable plants and processes; the same concentration on new inventions and on lines in which there is

There are national organizations pedition, much valuable work was And in still other cases they are promoting rationalization in Germany, Austria. industry that has never been cartelized. There is a coal trust, but no coal cartel. Following the collapse of the French invasion of the Ruhr, which had put most of Germany's coal in alien hands, the industry found itself facing a desperate situation. Not only had the French occupation seriously affected the efficiency of mine operations but other trusts. It was promoted rationalization under six different sections. Thus, during the importance. The House Plan, Harvard College

I-Backgrounds and Facts

By CHARLES FRANKLIN THWING President Emeritus of Western Reserve University

eval student was a lawless young-Fights of his class and facother classes and factions were a favorite pastime. Drunken brawls were not uncommon. Liberties became licenses, licenses ofat meals to the beating of a servant, or to the killing of a fellow student, disorderliness and anarchy a subect of constant debate and of regu-

lation more or less formal. In the American college such anarchy never became quite so anarand sixteenth centuries at Bologna and Paris. Yet the first college founded in the New World in the seventeenth century suffered from not dissimilar disorders. These disorders, too, were continued into and beyond the century. Drunkenness, and especially rebellion against the ons, constituted an important part of the never-ceasing disturb-"Combinations among the undergraduates for the perpetration of unlawful acts"; "disorders of which they were guilty by being absent from their chambers, contrary to law, at unseasonable times of night" riotous disorders"; represent prac ices at Harvard College which vigilance did not prevent.

Need Still Present

life were a transcript of the laws of the colony. Of course, too, meticulous methods of college discipline passed away with the passing of similar methods in the colony. But, be it said, the general spirit out of which these disorders and primitive measures grew, still abides. That spirit is the spirit of college youth separated from their homes, youth of intellectual power, youth of overflowing feelings, youth of extravagances of will. It is a spirit over which, felt in a proper degree, exercised in proper proportions, every human being exults. It is to guide, to guard both to repress and to increase this spirit, that the House Plan of Har-

vard College is formed.

The downright need of proper provision for the housing and the feeding of college boys has in recent years become imperative. The primary cause of this imperativeness lies in the vast increase in the number of students. The vastness of this enlargement has created problems; problems many and diverse, problems of intellectual training, problems of moral culture, problems of social adjustment and, perhaps most insistent, problems of the housing of students. The problems relate to both groups and individuals. As Prof. Charles Seymour of Yale has recently said: "At present some thousand undergraduates are provided with housing which is certainly inadequate and might reasonably earn a

more severe characterization Impressed by this and similar conditions, Edward S. Harkness of New nated in these schools, though the York has given to Harvard College more than \$11,000,000 for building and equipping houses or dormitories for students. He holds that Harvard, like many large colleges, should house the students in small groups. "He believed," said President Lowell, "that the division should not be based upon differences in the subjects studied or the career the members intended to enter; that, on the contrary, men interested in various fields of thought should be thrown to-gether with a view of promoting a

broad and humane culture. It is at once to be said that the plan of division of students into small separate unities is not new at mally and informally for more than 50 years. In between the years 1877

EHIND the Harvard House plan and 1892 articles regarding the Behind the Harvard House plan and 1892 articles regarding the method were published in the undermethod were published in the undergraduate papers. In 1906 President Eliot wrote of it in his annual report, and Charles Francis Adams discussed it at Columbia in a Phi Beta ning at Bologna, continued and en- Kappa oration. In the year 1860 Harlarged at Paris, passed from Paris vard had 431 students; 30 years larged at Paris, passed from Paris to Oxford and to Cambridge on the Cam. From Cambridge on the Cam, to Cambridge on the Charles, from the nature of the problem of housthe American Cambridge to Yale ing, but it has increased its essenand other American colleges it tial urgency. A like change has also within half a century occurred in the number of the students in every long, academic, bi-continental story.

It is a history in part at least of unseemly disorderliness. The mediunseemly disorderliness. The mediunseemly disorderliness. The mediunseemly disorderliness. The mediunseemly disorderlines are also become a state of the stat fornia on the Golden Gate.

What It Is Not The House Plan at Harvard, be it at once said and negatively, is not:first, to establish a new college or fenses. Throwing stones at pro-fessors was a recognized form of new colleges; second, nor is it to fun. Discipline was foreign to the subdivide Harvard College into colacademic routine. From tardiness leges; third, nor is it to form and to develop a new system of education; runs the whole gamut of college disobedience and crimes. The impossione may have conjured, a new sysing of money fines, floggings, imprisonment, expulsions, represent forms of punishment. Whether a student should or should not reside into social classes; sixth, nor is it in a college hall was in all this to create a division of students on the basis of so-called "interests," such as literature, classics, sciences.

On the contrary, the House Plan represents, as President Lowell has said, quite an opposite spirit:—"Our policy at Harvard for a score of years has been leading up to this result, by its effort to abolish the social away their independence; which shall offer to the school and the other schools of the city, especially in football. A high standard of sportsmanship is maintained. The great matches of the ment; which shall promote social result, by its effort to abolish the social chistic as it was in the fifteenth said, quite an opposite spirit:-"Our policy at Harvard for a score of years has been leading up to this result, by its effort to abolish the social segregation on the 'Gold Coast,' by. its attempt to give great individual attention and consideration to students in their conduct and their instruction, by the more personal work of the Dean's Office and the personal contact with tutors, by its effort to bring about a more serious interest in intellectual pursuits and the in intellectual pursuits and the achievements of civilization. The aim living, corporate and individual. The is to bring into contact a body of students with diverse interests who students with diverse interests who dormitories, the groups therefore for will by attrition provoke one another the new houses will be composed of to think on many subjects, and will have a corporate spirit. For this purpose their number must be considerwill be under the charge of a master, two of whom have already been Of course, attention to the careful able without being so large as to subsupervision of such details of student divide itself into smaller self-suffidivide itself into smaller self-suffi-cient groups. The plan is expected to class and divided like a schol-

How to Plant a Tree

By H. ROY MOSNAT

shrubs is better understood, this. Care must be taken not to scrape the bark or otherwise injure the tree, and keep it upright in done in the autumn season, one advantage being that more care can be given as there is less rush of work than in spring.

the tree, and keep it upiget a straight position, not leaning to one side. Last, but not least, water thoroughly.

A little ridge of earth may be

In fact, fall planting in the north may be safer than in milder climates, because the trees once planted freeze and stay so until spring, often with a protection of deep snow.

But just how should a tree be planted? That seems a very simple thing, but nevertheless it is perhaps often done wrongly than

Holes should be dug large enough to accommodate the roots without cramping them or crowding when spread out as nearly as they were before being dug as possible. Be careful to prune away cleanly all of the damaged roots, so that there is a clean surface, which will heal much more quickly and send out rootlets to support and anchor the tree. It is not necessary to paint the cuts made in roots, as in branches. The look are in the soil out of the way of checking and drying, to which cut checking and drying, to which cut.

As the trees arrive from the nursbranches are subject in the air, resulting in decay.

A small pyramidal mound of loose

under this mound of loose earth. But the fertilizer should be covered, so the fertilizer should be covered, so instance. as not to come in direct contact with

If the soil is dry, a thorough watering before the earth is filled in around the tree will do much more good than surface sprinkling after

the tree is set.
It is impossible to pack the earth too firmly or tight around the roots, as long as the roots are not injured. Water is the best way to pack the earth about the roots and remove any air pockets, which act like poison to the tree roots.

Do not plant too close to buildings, poles or wires, or to sidewalks or paved streets.

Filling In

The tree should be held firmly in an upright position while the earth is being placed back in the hole. So it is best to have two people do the work, one holding the tree and the other filling in the earth. The tree should be set so that it will be about the same depth as it was originally before transplanting, after the soil in the new position has settled. This eans that the tree should be set a little deeper than it stood before, chief articles of the tree's diet. cause the loose dirt will settle somewhat in time. The earth should be pressed down firmly about the

ANTIQUES · AND · INTERIOR · DECORATION

In the Shops and Homes of Denver,

By CARL GREENLEAF BEEDE

HE interest in interior decoration shown by people of Denver, as I have recently met them, is alert and prevails quite generally. Nearly everyone who is concerned with choosing some particular style for his or her home furnishings seems to select one or more of those which prevailed during the eighteenth cen-tury in either England or France. There was no difference of opinion expressed on this point by those with m I talked and who were in a position to know. Those who came osest to the trade in the three largest department stores had found the ame tastes on the part of buyers as had the professional decorators whose business was not the selling of

The importance of Denver as a distributing center for several states gives these conclusions significance as a gauge of the buyers' desires not only in Colorado but in Wyoming on the north, in New Mexico on the south, and to some degree stands for

those of Arizona and Texas.

It is only a few of the French and English eighteenth century styles which are thus most frequently which are thus most requestly chosen. They are those which ap-peared before 1725 and after 1775. In England this would include the Queen Anne forms in the earlier years mentioned and those of Hep-pelwhite and Sheration in the later

quarter-century.

The French furniture of similar times would include the early Louis XV forms and the Louis XVI. The long period of 59 years included in the reign of Louis XV made a stretch of time which covered marked changes in home-furnishing fashions. These were so great that the modes of the beginning of his reign were greatly changed before it was ended. Chippendale Less Cared For

It will be noticed that the most famous name among English designers does not appear as a popular choice. Chippendale's style, which dominated English cabinetmaking for a quarter century following 1750, red for less than are the simpler shapes, which came before him.

Denver is not peculiar in thus leaning toward the graceful, undecorated curves known as the Queen Anne, and ful inlays of Chippendale's successors in the field of English cabinetmaking. These buyers are displaying the same discrimination which has made like styles preferred not only in eastern American cities, but in England as well. The excess of ornamentation in the rococo manner, which was applied in Chippendale's time in England and in France, does not usually receive approval from the educated tastes of our day.

These observations apply to a view which considers the styles in interior decoration rather than actual antiques, or furniture made in the years to which the style names strictly apply. It is the reproductions of these styles that buyers are taking, as a rule.

Those who are provided with abundant means would, of course outfit their homes with fine, unquestionably authentic, eighteenth-century furniture. It is hard to find except at high figures, but when it can be bought wisely it becomes both a constant joy and an increasing financial asset.

Modernist Interior of Junior League The twentieth century forms and colors which are pleasing so many eastern American cities apparently have not yet taken the fancy of many reesidents of Denver. The stronges vote in favor of l'art moderne has been struck by the young ladies of the Junior League, in their new club rooms. It is all the more significant cause the entire scheme in planning and execution is their own members' work, as I understand it.

This assembly room has much vivacity and various elements of the charm of the new mode. It as a unit it impresses one with its naïveté rather than with its sublety, it cut across the grain, a style much in vogue in the seventeenth century. firms making modern furniture in the inner side of the writing flap had better for everybody. He believes, that more people are interstands out as a fine bit of amateur adventure. It promises to lead those who enjoy it to learn more of the satisfying pleasures to be found oyster and locked with a pierced rustless steel key the color of which

Antiques From Southern States What has been said so far has to do with the forms, or styles, of new furniture that appear to be best liked. Most buyers of such things chose to have about them such things as carry the lines of early periods, but they are not particular about the antiquity of the objects. A considerable number of people whom I met do have the flair for the genuine antique. They are diligently seeking it while treasuring whatever they may have inherited or bought.

Judging by the contents of numerous homes which it was my privilege to visit, there is in Denver much more the wood. In the ordinary way one ready to pay for good designs.

man carries through a job single
Workshops Worthy a Visit old American furniture from the southern Atlantic states than from handed, but as this particular piece had to be ready in time for the exhithe northern. It might be wiser to say merely, that I saw much of the one but little of the other. Native bition, two men were set to work on walnut wood, which was used in Pennsylvania and points south predesks, bureaus, and chests of drawers which New Englanders would have built of maple or cherry in similar man's room. Originally an ugly little

As a rule, these Southern pieces are constructed on more generous lines than was the New England practice. This fact may reflect the marked difference in the typical homes of the two regions. In the South broad plantations, spacious homes, large establishments, contrasted with the typical limited holdtrasted with the typical limited hold-ings, the more modest housing, the with all its contents inside out of North, in its rural aspects.

nore rigorous surroundings of the North, in its rural aspects.

Empire Examples Often Seen

When one remembers that Denver was settled only 70 years, it is surwas settled only 70 years, it is surprising to discover what a variety and large number of fine old things are found in its homes. This means, of course, that many families that have come here from other parts of the country since the days of railroads have brought with them the best of their household furnishing. of course, that many families that Examples of the American Empire also a very practical book table with

Simplicity the Present Trend

REAT periods in furniture have come and gone. Some of them have been characterized by exravagance and some by simplicity. has father slavishly accepted the styles of an aristocratic age, but the days in this line are carefully studied.

For instance, take the sunroom. In the period just passed this used to be a gay place. Nobody, it seemed, could make it showy enough. It had to be equipped with comfortable chairs, chaise-longues, footstools and desks and tables in vivid colors. But the modern sunroom is different. A few pieces of stick willows, a neat grass rug, some low shelves for books, a pretty table of some odd shape, adorned with black pottery these are sufficient to furnish an upa cactus garden for the window, or one of those new indoor rock gar-dens. And no doubt this simple equipment makes the place more restful than would showier and richer fur-

The boudoir is also simply furnished, but usually it has a little more color than the other rooms. A number of bright cushions, some shelves and drawers, a few books, a chair and a table may comprise the inventory of the room. One of the late boudoir tables is finished in pas-

tel colors.

The bedrooms contain nothing which hints of an aristocratic style. A suite of inlaid wood, attractive but plain, is all that is ordinarily found in a modern bedroom. However, sets more brightly painted will be found

For the dining room, the painted pieces and the pretty new inlaid woods seems to be equally favored. Tables are almost as plain as those used in public cafés. Chairs are a little more ornamental, but are simple in line and are upholstered for greater comfort. Coverings are in crushed velvet and are usually shaded in lemon and orange tints.

Drapes in the geometric designs seem to be considered the most up to date. There are many patterns, some being in bright colors, while others fabric is used which is appropriate for each season—that is, the thin, sheer material is utilized for sum ployed for winter. To be in the mode the drapes must either have triangles in their folds or hang perfectly straight.

The modern living room suggests quiet. At one end of it is the librarya plain space for numerous books. Over the mantel of the fireplace is also an open shelf for books. Above the shelf is a large unframed mirror, square or rectangular, and lighting fixtures of suitable shape are placed where they are needed. On either side of the fireplace are bookshelves of odd heights, and in front of it prob-ably is spread a linoleum carpet. There are easy chairs in velour and a table which is conspicuous for its many shelves. In the library stands an inlaid desk in the center of the m, and a plain-fashioned davenort invites one to recline

The modern child's room contains nostly furniture of the painted style. A bed with a simple headboard, a tall chest of drawers, a low round set of shelves, and a plain mirror with a tall sheet on either side, just

about complete the furnishings.

For the girl's room there is small table on slender legs, and the top is hinged so it can be raised. On the under side of the top is a mirror, and in the lower recesses of the piece are spaces for many toilet

BOOK REVIEWS AND LITERARY NEWS

The Rising Generation

of a book society; the second, his distrust of sequels. In the case of "Nicky, Son of Egg," to push this slender sequel into excessive publicity was to do Mr. Bullett an injustice. The charms of his book are definite but frail, and its defects too obvious. Here, one feels, is the careful but tenuous draft of a full length novel, which has slipped out of the novel, which has slipped out of the author's hands before its time. Howauthor's hands before its time. However, the presence of Egg Pandervil, that excellent grocer, assures a sympathetic reception for the son.

The Suburban Horizon

Nicky was a baby in Mr. Bullett's previous novel, the surprising child of Egg's later years. The familiar of Egg's later years. The familiar suburban horizon is delineated in the opening chapters, with Nicky's mock battles, schooldays and gauche curi-osities in regard to life in the foreground. The child grows up in those days just after the Boer War, and the lonely father, contemplating his disappointing family with sadness, is to refresh himself in the youth of his son. The delicacy of their relationship is very well rendered. It is the golden thread that makes the

"The Boundary Post" is a translation from the German and it presents an excellent picture of post-war Lorcupation. The book is possibly partisan-what frontier literature is not? it labors to give a palance picture rather than to make a case Without raging at the iniquity of frontiers or stirring up the old passion of the war, it records the situation as it finds it now.

The picture is seen through the eyes of Isy Mathieu, who returns from Germany to Lorraine after the war to the home of her French rela-tives-in-law. Her Lorraine husband had fought on the German side, his brother with the French, and her kinsfolk are scattered on either side of the arbitrary impersonal boundary post which knows nothing of the conflicting loyalties that pull thou-

finances of Europe. 'One obscure branch of the family, bearing the name of de la Vannes, Anglicized to Delavan, had migrated to America. The descendants of that branch had fashioned letters and the shrewd comments of the author, the reader Gruenturm saga remained potent in their consciousness as long as Grandpa Michael Gruenturm Delavan was able to find someone among his grandchildren who would listen cause they sought to maintain it, more often because they were determined to be rid of it. In one way or another they were still in a street of chains.

The somewhat intricate plot of the book is built on the devotion of Carlie Delavan to the Gruenturm tradition. She alone set her face against mixed marriages, though she herself was three-eights Jew and five-eights Gentile. She alone re-membered the family motto to which her grandfather had made them all swear allegiance: Fidelity, unity, loyalty and concord. When beautiful cousin Tress committed a lapse, less a happy addition to the biographical bookshelf, a credit to the biographrapher. The employment of a historian is not one that focuses the at-United States from the Compromise lover. The plausibility of the plot may with money and succor for the re-

THE "HIDDEN" VERSES

OF THE BIBLE

WHEN you want to find what the Bible teaches on a certain subject, where do you go for the information? To a concordance? If so, the chances are you are missing some of the most illuminating and vital verses bearing on the subject-the "hidden" verses, or those which do not contain the subject-word and hence cannot be located by means of a concordance.

Take the subject of "Prayer," for instance. Are these any more vitally important verses on that subject in the entire Bible than the following?

"The Lord is nigh unto all them that call upon him, to all that call upon him in truth." (Psalm 145:18). "Ask, and it shall be given you; seek and ye shall find; knock, and it shall be opened unto you: For every one that asketh receiveth; and he that seeketh findeth; and to him that knocketh it shall be opened." (Matthew 7:7, 8).

Yet the word "Prayer" does not appear in a single one of those verses! And so it is with hundreds of other subjects dealt with in the Bible. Ofttimes the verses of the very greatest significance to you as a seeker for Biblical guidance, are literally hidden away where you will find them only by chance if you depend on any but the most up-to-date system. Can you afford to risk overlooking such hidden gems by using antiquated methods in your study of the Bible?

System Bible Study Eliminates Running of References

In the System Bible Study these "hidden" verses, as well as the others, have been collected together and printed under the subject to which they relate, word for word as they appear in the Bible. No references to run—the work has been done for you! All that is left for you to do is read, study, absorb the great teachings which the inspired Word of God holds for you. These verses are always there, always ready to guide you through the dark and dangerous paths of the modern age.

FREE SPECIMEN PAGES

back toward the terrace, quite accidentally, in a quiet and somewhat melancholy corner of the garden, chanced upon a little barred and wired-in inclosure, rusted and formal the metallic manner of the garden, with the reofed-in ourse are that the state of the state lorn, which, with the roofed-in ours are that the poets have cerapartment behind it, had once been tainly aided in guiding mankind toapartment behind it, had once been an aviary. The children went inside and, presently, reappeared, the elder of the two bearing delightedly on his crooked elbow a tame jackdaw. The bird had but recently attended the meeting in the drawing-room as the meeting in the drawing-room as the sole representative of the furred and the sole representative on the furred and the sole representative on the furred and the sole beak and glossy plumage. feathered people, and, now, it would dark and sleek." Wordsworth's Green seem, had retired to meditate over Linnet; his experiences in this his quiet her-mitage: for the empty aviary was, we were told, his own chosen home, we were told, his own chosen home, and there, in his doorway, though free to go flying in the beech tree tops, he would often sit, watching the doings of those who had found and fed him when a baby bird. That jackdaw must have bewitched my long, for when night came I lay have so many I cannot choose which fancy, for when night came, I lay awake, thinking of him, and just as in a quaint lyric of the fourteenth century, a poet out walking heard a fowl with feathers black speak to him from the woodside and say

Make amendes, man, trewely, make

so I, who had heard, in company with the jackdaw, of many unkind things done to the birds, felt he might have wished to say to me, "make amends. The wise old owl who lives in an oak tree hard by my bedroom window, with his Te-whit, Te-whoo seemed to say, "Yes do. Yes do;" and ere I slept, I had resolved to write once more about the birds. So this morning while my favorites sing in morning while my favorites sing in the sunny autumn garden as they feast on my great green apples and long yellow pears, I begin, and if you do not like this sermon-like essay,

seem to me that men should have ever taken pleasure in birds in to have wings, have ever felt brothcages; mewing-up thrushes, finches, tits, larks, parrots and canaries in captivity; and, even up to Victorian days, deeming an aviary to be a crowning ornament to a garden. Surely, I have sometimes said to myself, the children of other days with their tender hearts and purer thoughts must have often been sad-dened by the fate of these innocent, imprisoned creatures; for children, like poets, have always been the friends of the birds. Aviaries are now happily quite out of fashion. Gone never to return: but recently I found proof of my surmise and saw how both children and poets had helped the birds to freedom. My evidence is in the recently published

THE CHRISTIAN SCIENCE JOURNAL CHRISTIAN SCIENCE SENTINEL LE HERAUT DE CHRISTIAN SCIENCE DER HEHOLD DER CYRISTIAN SCIENCE CHRISTIAN SCIENCE QUARTERLY

Walking one afternoon with two little boys down a long avenue of beeches in the garden of a famous old English house where a meeting of animal lovers had just come to a close; still thinking of the snares and trials that are part of the experience of the beasts, and especially of the still too prevalent custom of shutting up sweet wild birds in tiny cages; we came to a lily pool where swans were floating; fed the swans, and then turning back toward the terrace, quite acci-

More and more curious does it seem to me that men should have erly toward them, and who should know, as they do, what the birds say, or what they look like. But the green earth and the blue sky have always been the poet's aviary and his verses have been ever dedicated to free birds who choose them out a bough and sit and sing. And when a poet has found a prisoner how very deeply he has felt its woe.

> I cannot brook thy gaze, beloved bird-

Masters of Water Color

Like for those who have little appreciation and use of curly, rococo tunately placed in so tar as access to
the world's treasures of art are concerned, the series of carefully produced art books issued by The Studio
(London) at 5s. each will be of value.
The various series published by this
enterprising periodical deal with
many aspects of art in the past and
present. Special attention is given to

Peter de Wint and Rowlandson, respectively. G. S. Sandilands writes on the first two, Martin Hardie of the Victoria and Albert Museum on De Wint, and Osbert Sitwell on Rowlandson. These three writers discuss with zest, acumen and welcome freshness the work of four artists who are among England's greatest masters of watercolor.

Defention of Thyrons who.

a host of water colors in a variety of styles. To him we owe many exquisite sketches of Gothic architecture in France, as well as scores of sketches made in French and Italian cities. A goodly number of his works
-acquired at the beginning of the

British Film Notes

LONDON-H. G. Wells, who has long been an illuminating and outspoken critic of the films, has now made his bow as a film author,

His films are the slightly old-fashioned type of comedy, mainly written round one character. Such films seem to be as slowly and surely disappearing as are plays written round one character. One wonders if the days of film stars are waning, as are those of the great lone star actors. "Tonic," "Bluebottles" and "Daydreams" are the names of could be done nowhere but on the screen, and "Tonic" presents a picture of an English country road. taken from a new angle that opens out a vast vista for the films.

some lesson against playing with fire: graphed and directed. The story is that of a young girl, who commits a legally justifiable crime in self-This is discovered blackmailer, who characteristically overreaches himself, and the end is satisfactory to all concerned. The scenes are laid in London and will be pleasantly familiar to many and genuinely thrilling to all. Particu-Darly good and interesting pictures are those of the chase, by the famous Flying Squad of Scotland Yard, through the streets of London, and especially those shot in the British Museum and the final scene on the roof of the famous reading room, where the villain is brought to bay.

excellent dialogue is used sparingly and pointedly, and is an instructive indication of the lines upon which dialogue for the "talkies" ould be written. It also conclusively answers two moot questions. One as to whether the talking films will swamp the silent. This will sure ly not be the case, for "Blackmail" sets up a standard of art which will have to be lived up to, but which can never become cheap or common. Whilst, secondly, it shows that if the "talkie" has come to stay, it will have

to stay in its place.

Amid much fine acting in the film, undoubtedly the best is that of Donald Calthrop as the blackmailer. Whilst this actor attained a good position on the stage in straight iuvenile parts, he should attain a great one on the screen as a char-acter actor, in parts of this descrip"The theme will b

A first hand famous pictorial masterpieces and for others more fortunately placed in so far as access to

many aspects of art in the past and present. Special attention is given to the color plates and reproductions, which are, indeed, uniformly excellent throughout those volumes of the different series already published, sketches brought him but little different series already published, each album of reproductions being prefaced by a monograph written by an acknowledged expert.

Four recent volumes—each containing eight color plates—in the series of "Famous Water-Color Painters" deal with Turner, Bonnington, Peter de Wint and Rowlandson, respectively. G. S. Sandilands writes chosen to show Rowlandson's art in

Before the arrival of Turner—who Dutch extraction, who was born in 1775—painting in water 1784 at Stone in Staffordshire. He was born in 1775—painting in water color was not taken very seriously as a form of art in England, or indicated in any other country. It was brought up in England, and from his earliest boyhood dabbled in drawing. While still a youth, he was apas a form of art in England, or indeed in any other country. It was looked upon as an agreeable hobby for gentlemen of leisure, a suitable pastime and accomplishment for young ladles and, at its most serious, as a preliminary to engraving. Turner was a visionary and a poet, and he dignified the despised medium by using it to communicate to us his wonderful visions of light and his golden nature-poems.

Richard Parkes Bonington, born 26 years after Turner, was brought up mainly in France though of British parentage. The friend of Delacroix he showed the highest promise, and the beautiful ("Cheyne Walk" and "Sunset in the Pays de Caux" in this volume prove what a rival he succession." In searliest boyhood dabbled in draw-ing. While still a youth, he was apprenticed to John Raphael Smith, the famous mezzotint engraver. De wint's this excite the famous mezzotint engraver. De was devoted to wint's whole career was devoted to wint's have a devoted to his art. "I do so love painting," he is reported to have said. "Mine is a beautiful profession." He was known and respected by all the famous painters of his time, and his style met with appreciation among his fellow artists. "Try something like the solid blocks of sober color in De Wint" is a significant note in one of Samuel Palmer's private notebooks. De and original—in contrast to his ordinate heautiful ("Cheyne Walk" and "Sunset in the Pays de Caux" in this volume prove what a rival he

A Key to Contemporary Music

: III—The Reconstituents

By EDWIN EVANS

two ideals of expression, lyrical, po-etic, ethic, didactic or what not, and energy or dynamism. This goes back problem of the neoclassicists, the quotation containing more true æs-thetic philosophy than is at first ap-

Swings of the Pendulum

the Spieltrieb-as that impulse has been called. Even the contemporaries of Bach were swayed by it and after his passing the composers of the baroque period aimed at elegance in preference to profundity. Probably this was why in the nineteenth century the pendulum again swung with equal violence toward a certain extreme idealism.

In recent years two circumstances have combined to place such ideals at a disadvantage: the passing of a romantic movement which had ended n an atmosphere of exaggeration, and the world war. Composers, and which the familiar phantasms of romance were rigidly banished. Even the youthful were devoid of sentiment and generally flippant. Under such influences, according to their mperaments, they either cultivated the hedonism of music, or, if they were intellectually inclined, they indulged in intellectual forms of the Spieltrieb and became unromantic doctrinairies, working out puzzlesystems. The double impetus carried the pendulum to an unprecedented extreme in what has become known as Armistice music. Now it appears to be slowly turning back.

Now the first of the reconstituents was a rhythmic manifestation which it will be convenient to call dynamism. It was not new-how could the Scherzo of the Ninth Symphony endures?—but it returned in a new aspect, bringing new ideas in its train. Rhythm, the oldest element in music, was suffering from "arrested development." The idiom which had development." The idiom which had development. The idiom which had development at the process of the Ninth Symphony rarely practiced by professional music has a recondemned to devote themselves. One must not then reproach young seekers for their temerity and authority. They are blameworthy only when they are artificial and systematic; but most of the time, they are development." The idiom which had development at the process of the Ninth Symphony as a possibility, and of a gigantic performance of the time, they are artificial and systematic; but most of the time, they are artificial and systematic; but most of the time, they are datic; but most of the time, they are artificial and systematic; but most of the time, they are had acity. They are blameworthy only when they are artificial and systematic is obliged in the process of the reproach young seekers for their temerity and authority. They are blameworthy only when they are artificial and systematic is obliged in the process of the remeives. There appeared to be no valid reason why rhythm should not be disintegrated and metamorphosed in a manthematic material. The counterpoint of rhythm was also susceptible of intensive development. All this was brought into prominence by "Le Further many newspaper editors

Postscript

In these three articles few names have been mentioned, the reason be-AVING described some of the the seventeenth century and part of ing that their purpose was a classification, not of composers or of works, but of ideas and currents, which might manifest themselves in forming their program. Richard a phrase and to many a situation of the program of the program of the plot. Krauss's technique of precally the next step is to describe those which are engaged in putting it together again. But before we proceed to do so there is another matter which demands attention. In the first which demands attention. In the first sense of its intimate correlation of these articles reference was made material. It was evident to most examples would have involved an of the leave period in musical history. To have suggested material. It was evident to most examples would have involved an of the leave period in musical history. To have suggested clear, this year kept—or was kept— more apparent than under Krauss. this was not the proper place, even if space had been available.

At the outset I gave my opinion the proper place, even as the space had been available.

At the outset I gave my opinion successful of all; a considerable net in more apparent than under Krauss. He was often startling, and always interesting.

Clarity was the keynote, also, of Dr. Lothar Wallerstein's stage di-

ing which the thought is wrestling with the means, forging the idiom. is probably with us now, but it will take a longer perspective to discern Its main pattern in the argy of empiricism which necessarily accompanies a change of orientation. At present one can scarcely see the forest for trees. The one thing that is tolerably certain is that very little of that empiricism will prove to have been wasted effort. Doctrinaire 'systems constructed by intellectual processes may look forbidding, but the past shows that they have had something to contribute to music. So have the more poetic adventures. objective or subjective, of seekers after expression. So have even the

The Crisis in Criticism

By EMILE VUILLERMOZ

Paris THEN these lines appear, critics of every country in at Bucharest in international con-gress. Their program provides for examination of some extremely inespecially young composers, found themselves in an atmosphere from comments. Before taking part in comments. Before taking part in these meetings, I should like to sum

There is indisputably a crisis in criticism. It is not a crisis in re-cruiting. Far from it. Never before have there been so many people of perishable masterpieces. One can good will and so many amateurs generously offering to become magis-trates at the tribunal of æsthetics. We are always being told regretfully that agriculture lacks hands. It is a regret that it would be difficult to xpress in the domain of criticism.

There will be much to say on this growing invasion of amateurs in a profession which, for many of bur

contemporaries, seems to require no special knowledge at all. The Literary Offensive

Musical criticism has suffered to begin with from a formidable offen- the result of which does not always one call dynamism a new thing while sive from literature. It is indeed the Scherzo of the Ninth Symphony rarely practiced by professional mudominated the nineteenth century sorbing technical studies which do interestedness was, to say the least, not very strong not leave him much time to cultivate on the rhythmic side—not so strong letters. While a writer pursues his "flight forward," which seem the for instance as the idiom of the classical studies, a musician spends last word in the art of battles and Tudor classics—and the time was most of his time at the Conservatoire ripe for a more vigorous pulsation classes, and has to be satisfied too der in the onlookers a distressing Krauss, who on this ocasion made all but suppressed the local color of and for a constructive use of rhythm, often with elementary general instruction. The editor of a newspaper or a revue, therefore, rather distrusts these professionals who do not know how to use a pen except to put them, moreover, are incapable clearly expressing what they feel and

STEINWAY

"PETROUCHKA," painted for the STEINWAY COLLECTION by NICHOLAS REMISOFF

It is the opinion of many critics that Stravinsky has never surpassed his colorful ballet "Petrouchka." To them it expresses completely the striking personality of its famous composer. Certainly the brilliance and originality of its scoring and the keen insight of its characterization set it among his undisputed masterpieces.

* * * IN TEACHING a child to play the piano, parents and teachers are the first to recognize the susceptibility of the youthful mind and fingers. Yet frequently they feel justified in allowing him to practice on an inferior piano until they find "whether a Steinway would be worth while." By so doing they disregard the development of his whole tonal sense as the very

foundation of his musical appreciation and expression.

The rich, sonorous tone-quality which distinguishes the Steinway has long been the acknowledged standard for pianoforte music among the musically informed. And it is this inimitable tone that has caused virtually every noted musician from Liszt to Stravinsky to choose the Steinway as the perfect medium for his art.

Yet children are often denied the influence of this tonal perfection because of the impression that a piano of such acknowledged superiority must be an extremely expensive instrument.

As a matter of fact you can have a Steinway grand delivered to your home today, for an original payment of only \$147.50 . . . a medium for your child's expression that will give

a lifetime of perfect service and satisfaction. And there is the index of the true economy of a Steinway. . . . You . need never buy another piano.

Upright piano can be bought for \$875

GRANDS \$1475 and up

SQUASH SEASON IN N. Y. NEARING

Metropolitan Team Play to Begin a Week Later-Some New Clubs

teams.

It was announced that the play in the metropolitan team championships will begin a week later than last season, but will not last any longer, as the scheduled dates will permit a gain of several weeks during the season. As usual the Class B group will start the season, on Monday, Oct. 28, with Class A beginning two days later and the newcomers into the game, the Class C teams, following on Nov. 1.

The clubs will be approximately the same as last season, with a few important exceptions. The Park Avenuc Club, which has been represented during past years in Class B and Class C, has also organized a Class A team this year, and hopes to be admitted at the meeting of the executive committee next week. There is little doubt that the application will be acted on favorably, which will bring the clubs in that section of the play up to eight, a more convenient number.

Eleven Clubs in "B"

Eleven Clubs, the same as last year, will compete once more in Class B, will compete once where the compete once in the play in the tent that, unlend then that, unle

Eleven clubs, the same as last year, will compete once more in Class B, while 14 are possibilities in the lower while 14 are possibilities in the lower class, with Heights Casino and possibly Shelton dropping out, and an application from Block Hall, which sent several good players to the Class C title tourney last season, now being before the committee for its considual. ration. Heights Casino has converted courts entirely into squash racits courts entirely into squash racquets, and expects to revert to that style of play. Shelton Club has been handlcapped by the lack of a regular organization, and most of its players are only occasionally available.

cause quite a number of shifts among the leading stars of the game, many of whom have been representing other clubs, though members of the newer club. Thus, Frank A, Sieverman Jr., formerly of Fraternity Squash Tennis Club; John D. Kennedy, Columbia University Club; Charles F. Fuller, Harvard Club, and Thomas R. Coward, Yale Club, are all likely to be on the team of the new organization as soon as it is admitted.

The first individual event of the company of t

The first individual event of the season, the annual fall scratch tournament, will probably get under way about the 15th of November, but the place has not yet been determined, and will await the meeting of the executive committee next week.

Complete List of Clubs The complete lists of the various clubs in the Metropolitan team cham-

clubs in the Metropolitan team championships are as follows:
Class A, Columbia University Club, (champions); Harvard Club, Yale Club, Princeton Club, New York Athletic Club, Crescent Athletic Club, Fraternity Squash Tennis Club, and probably Park Avenue Squash Club.
Class B, All of the above, also City Athletic Club, Montclair Athletic Club, and Short Hills Club.
Class C, All the clubs in Class A, lity Athletic Club, short Hills Club, Slizabeth Town and Country Club, Apawamis Club, and possibly Block Hall and Shelton Club.

Aver-NEW YORK—Preparations for the coming indoor season of squash tennis are now proceeding rapidly, and already most of the clubs are getting an average or 396 against 384 for F. C. Herman of Brooklyn and 381 for Rogers Hornsby, the Chicago hitter. It was announced that the play in the metropolitan team championships

drive of the Philadelphian.

Hornsby led in runs scored with 153 and L. R. Wilson, also of Chicago, set the pace in runs tatted in with 152.

J. H. Frederick of Brooklyn was out in front with 53 doubles and J. L. Waner, with 19 triples. Hazen S.

Waner, with 19 triples. Hazen S. Cuyler had stolen 40 bases to lead in this specialty.

Klein and Melvin T. Ott were tied with 12 home runs each, and Hornsby and Wilson were tied for third honors, each with 39 circuit blows.

Root Leads in Box

handicapped by the lack of a regular organization, and most of its players are only occasionally available.

The addition of Park Avenue Squash Club to the competing teams will cause quite a number of shifts among the leading stars of the game, many of whom have been representing other clubs though members of the payer the highest winner in the league, was the highest winner in the league, was fourth, because his 22 victories were balanced somewhat by 10 defeats

.688.

Philadelphia led in team batting with .309. Pittsburgh and Chicago were tied for second place with .303, and New York was fourth with .295. The Cubs led in team fielding with .975, and the Giants and the Reds shared second place with identical marks of

Fonseca Has Hitting Title Within Grasp

Great Batting Is Surprise to Everyone, Including His Rival, Simmons

CHICAGO (P)—Merely holding his own in the American League batting struggle last week was not sufficient to keep A. H. Simmons in the lead and L. A. Fonseca, Cleveland first baseman, ascended to the peak with an average of .378, according to unof-ficial figures which include Wednesdays games.

Connie Mack's outfielder played i Connie Mack's outfielder played in the continued, but only one game beween each team, as during the last wo years, will be scheduled in Classes and C, with the frome teams of last eason shifted as far as possible to ring the corresponding matches on the courts of the other. There will again be no playoffs, the champion-hips being settled on the basis of the egular series, unless a final tie makes!

Connie Mack's outfielder played in three games, and was credited with 10 maintain his 367 average, which lifted him to the top a week ago. Fonseca points to his mark. The Athletics had but two more games to play, and Fonseca appeared to have the individual title within his grasp. Other regulars following Simmons and Fonseca were J. E. Foxx, Philadelphia, 356; H. egular series, unless a final tie makes!

Manush, St. Louis, 354; A. M. Lazhips being settled on the basis of the egular series, unless a final tie makes xtra matches necessary.

The complete schedule will be made ublic some time next week, after the xecutive committee has approved it.

WHITE SOX SURPRISE

Were J. E. Foxx, Philadelphia, 356; H. E. Manush, St. Louis, 354; A. M. Lazzeri, New York, 353; R. R. Fothergill, Detroit, 347; G. H. Ruth, New York, 344; H. E. Heilmann, Detroit, 344; Dale Alexander, Detroit, 342.

Ruth Way Ahead
Simmons and Ruth each batted in

Ruth Way Ahead

Simmons and Ruth each batted in four runs during the week and remained in a tie for the leadership at 150, Ruth failed to produce any home runs, but his total of 46 was 13 ahead of that of J. Foxx, his nearest rival.

C. L. Gehringer, Detroit infielder, topped the field in three departments.

ALL-CALIFORNIA WOMEN'S FINAL

Miss Collett and Mrs. Pressler Meet for U. S. Golf Title

States Golf Association at the Oakland Hills Country Club. Miss Glenna Collett, a former eastern girl, now of Cypress Point. Calif., in defense of the title, met Mrs. Harry Pressler of Sau Gabriel, Calif., twice former women's western champion. They had never before met in championship play.

Both won their semifinal matches on the sixteenth, the famous waterhole, Miss Collett defeating the present western titlist, Mrs. O. S. Hill, of Kansas City, Mo., 3 and 2, and Mrs. Pressler defeating Miss Bernice Wall of Oshkosh, Wis., by the same score.

of Oshkosh, Wis, by the same score. The latter contest was in many ways eminiscent of the Pressler-Wall match for the western title in 1927 at Lako Geneva, Wis. The Collett victory broke a tie with Mrs. Hill, as they had divided matches in two previous years at other tourneys.

at other tourneys. Comes From Behind Again

when Mrs. Hill's second was short and she took two putts for a 5, while Miss Collett was on in 2, and down with two putts for a birdie 4. Par fours halved the eleventh and then Miss Collett PROBABLY the first time motorboats have ever been used to transport a college football squad to a game occurred Friday when the West Virginia

soth drove on, and Mrs. Presser, who is as 35 feet from the pin, sent the ball rolling over two humps and hit the back of the cup, bouncing four feet away. Miss Wall putted 20 feet and had a three-footer left. Her shadow was over the hole on the second putt and it curled off a fraction of an inch.

The next two holes were halved in

will again the series of the second put and it curled off a fraction of an inch.

Segrate, speaking at a complimentary dinner at Wolverhampton Friday night, said he expected to return to the United States in 1930 with Miss England II to try to regain for England the British International Trophy, taken by Garfield A. Wood 10 years ago. The boat he is now building would attain a speed of 120 miles an hour, he said.

Special To The Christian Science Monitor BIRMINGHAM, Mich.—An all-claifornia final was presented today in the thirty-third annual women's championship tournament of the United States Golf Association at the Oakland Hills Country Club. Miss Glenna Collett, a former eastern girl, now of Cypress Point, Calif., in defense of the cup for a sure 5, Mrs. Pressler little root Mrs. Wall, then only 1 down, went was the control of the cup for a sure 5 and 7.

Miss Wall, then only 1 down, went was the cup the cup of the cup for a sure 5 and 7.

2 down when she used two shots getand then Mrs. Pressler had another disastrous struggle with a trap. The thirteenth, a short hole, found Mrs.

Pressler in a specific page of the most bases in a series will be a constructed in the most bases in a series will be a constructed in the most bases in a series will be a constructed in the most bases in a series will be a constructed in the most bases in a series will be a constructed in the most bases in a series will be a constructed in the most bases in a series will be a constructed in the most bases in a series will be a constructed in the most bases in a series will be a constructed in the most bases in a series will be a constructed in the most bases in a series will be a constructed in the most bases in a series will be a constructed in the most bases. Pressler's in a trap to the right front. Remembering her lack of success in pin, Mrs. Pressler sent it way over the green to the rough. Running back she rolled again into the pit, and her back. She picked up, Miss Wall taking test. Several play

Mrs. Pressler Goes Two Up Single putts gave each a birdle 4 on the fourteenth. On the fifteenth, Mrs. Pressler went 2 up again, when the Wisconsin girl used three putts,

Comes From Behind Again

Miss Collett was again forced to come from behind to detend her title; but she did it in a less spectacular manner than that in which she made golf history in the quarterfinals to win on the nineteenth hole, after being dormle 4. Mrs. Hill held the advantage sil the way from the third to the eleventh and was 2 up at the turn after sinking a birdie 2. The western champion shot the first nine in 37 against a 40, being four better than par. Starting at the tenth Miss Collett rallied to win five out of seven holes, halving the other two.

Mrs. Hill gained her initial advantage on the third when Miss Collett's tee shot got brankered and the Missourian went down in 3. They halved the next five holes; on the sixth the adopted daughter of California approval decisive in this match, as it did in many others. Here Miss is did in many others. Here Miss is did in many others. Here Miss is did in many others, here match on a long of hole; but her second shot, which looked great at first, hit a peninsula after carrying most of the water, and bounded into the point. Which looked great at first, hit a peninsula after carrying most of the water, and bounded into the point. Which looked great at first, hit apeninsula after carrying most of the water, and bounded into the point with the sadopted daughter of California approposed by the point with the goldery and found a bunker; but she got out safely and sank an 18-foot putt for a half in par 4.

On the ninth Mrs. Hill barely missed the pin with her drive and she sank the putt for a birdie 2, while Miss SHIP—Semifinal Round The water guarding the sixteenth green proved decisive in this match, as it did in many others. Here Miss Wall outdrove Mrs. Pressier for the first time during the match on a long hole; but her second shot, which looked great at first, hit a peninsula after carrying most of the water, and bounded into the pond. She dropped 12; and tie for it back and laid her fourth on. Mrs. Pressier was short but safe in 2, and Yankees. The Country of the safe in 2, and 12; and the form of the pressier was short but safe in 2, and 12; and the fourth on the pressier was short but safe in 2, and 12; and the fourth on the pressier was short but safe in 2, and 12; and the fourth of the pressier was short but safe in 2, and 12; and the fourth of the pressier was short but safe in 2, and 12; and the fourth of the pressier was short but safe in 2, and 12; and the fourth of the pressier was short but safe in 2, and 12; and the fourth of the pressier was short but safe in 2, and 12; and the fourth of the pressier was short but safe in 2, and 12; and the fourth of the pressier was short but safe in 2, and 12; and the fourth of the pressier was short but safe in 2.

LAWRENCE, Kan.—With the season's openling game against the University of Illinois at Urbana, Ill., H.
W. Hargiss, head football coach at the
University of Kansas, is concentrating,
his efforts upon a varsity squad of 55
men, out of which is expected to
emerge one of the heavlest and best
teams Kansas has had in several past
seasons.

Coach Hargiss is ophy beginning his
second season at the Jayhawker
School on Mt. Oresid while Michael
Getto, tackle at the University of
Pittsburgh last year is a new line
coach and yet, enthusiastic forecasters
of Kansas possibilities are pointing to
the wealth of good backfield, material,
veteran and sophomore, and to a certain combination that will average 187
pounds in the backfield and 198 pounds
in the forward line.

Seventeen lettermen, eight of whom
are playing their third season, have returned to Kansas. Of these, his ear
linemen and eight are backs. Six of
the first-string men weigh over the
200-pound mark and five others up to
the 190-pound mark and five others up to
the 190-pound mark and five others up to
the 190-pound mark and above, on the
other hand, 18 of the first varsity are
untried malerial, having had no varwork and above the variety of the service of the season of the content of the service of the season of the content of the content

The Athletics as a team has

third in home runs. Cuyler is the lea ing base-stealer. Wilson is tied for third in home runs and has batted in the most runs. Hornsby, Cuyler and Stephenson have hit over .350.

Against this great quartet of hitters the Athletics have Simmons, Foxx, Miller and Haas, with Cochrane iiguring possibly in place of Miller. They also lead in several departments in their league. Simmons and Foxx have hit over 350 for the regular season. The Cubs have five regular hitters batting over 300, while the Athletics have six. The aggregate total of the leading three for each team shows Hornsby, Stephenson and Cuyler topping Simmons, Foxx and Miller.

AVIATION RADIO

Television at Berlin Show

A NOVEL feature of this year's radio exposition in Berlin, which filled two large halls, it possible to draw out the stations, was a special section devoted to television. Here the visitor saw various systems in operation. He could see a girl sitting before a transmitter with the process of and look at her picture in a re-ceiving set. Other receiving sets retelephone booths at opposite ends of co-operation of the sitted inventor the room which enabled one to speak Baron Manfred von Ardenne, has with and at the same time see the man at the other end of the line.

One of the most interesting trans-Dr. Banneitz of the German post, enabling the transmission of scenes in broad daylight. Very little is said about this apparatus, but it is known and Halske works can be adapted to that the freedom from artificial illumination is made possible by special photo-cell amplifiers.

order to introduce a certain uniformity. Thus the number of revolutions and the number of holes of the disk used by many systems has been

Four model receiving sets, two of which could be worked by hand, en-abled the visitor to understand the ber of revolutions in order to see the transmitted person plainly. The disk of the second set was set in motion with the help of a hand brake. The two other receiving sets were auto-

natically synchronized.

The Baird system is being built here by the Fernseh Gesellschaft, in which the Baird Inc., the Zeiss Ikon optical works, the Loewe Radio Com-pany and the Bosch Magneto Company are represented. The Mihaly system is being used by the Telehor company. Both employ disks with holes. The Telefunken company, on the other hand, uses a disk with lit-

Contract transmission of dots and dashes for guiding airplanes. A pilot flying on his appointed course will note that the dot-dash characters blend into one long dash of constant amplitude. but if he strays from the airway there wil be an inequality of the radio signals.

Varied Spacing Required

Mr. Walls, in charge of radio bea-cons for the Airways Division, on his recent trip over the Los Angeles-Seattle Airway, observed that a marked difference in terrain will require that the beacon stations be established at irregular intervalssome 200 miles apart and others at 50 mile intervals. The character of the terrain rather than the vagaries of radio waves will have to be the determining factor in the distances at which the stations are separated, according to Mr. Walls.

Supplementing the directive or radio transmitting range stations, so-called marker radio beacons are to be established on the 10,000 miles of civil airways—these units to be lo-cated freely along the flying routes, two or three for each radio range beacon. The marked beacon has been described as the milepost along the The visual indicator type is still highways of the air. Out, could nave been raised consider-chassis, you have a receiver in which the quality of the product is apparance. They figure that politics will play a day and made high like it is in the recommendation of the commission that politics will be regulated as a radiocasting subject to the mutual benefit of all parties.

They figure that politics will play a day and made high like it is in the program, despited by figure that politics will play a day and made high like it is in the program as well as the listener.

above all things a high impedance in the plate circuit. Many screen grid sets this year have obtained this by increasing the number of turns on the R. F. transformer primary from 15 up to 40 to 60 turns. This has been

This Shows How the Amrad Receiver Proper Appears Out of the Cabinet.

Amrad goes a bit further with the that the primary is resonated to a

Another advantage is that such a effective coupling at the high waves. to give more kick at the lower waves, this opposing tendency makes the

tages are claimed to be as follows: tages are claimed to be as follows:

1. Considerably greater sensitivity
which does not endanger stability, as
would be the case if this loss of sensitivity were made up by increased sensitivity were made up by increased sensitivity in the radio-frequency amplifier.

2. Does not cause detector tube-averloading, provided sufficient audio amplification is used in order to make the output power tubes overload first.

3. Has no appreciable effect on the
quality, as the selectivity of the radiofrequency tuning starts to cut off the
high audio-frequencies long before the
grid leak and condenser starts to cut
them off.

trical design from that now being future with confidence that radio of the points which enter into modused for sound radiocast. The one will be no longer blind.

FALL RIVER CLOTH MARKET HAS BEST TRADE IN MONTHS FALL RIVER, Mass .- With a better

tone prevailing this week in the local cloth market, sales were heavier than in any week of the last two or three months.

Sateens were in outstanding demand. Sateens were in outstanding demand. The 36-inch constructions were also was a familiar was constructed by the constructions were also constructed by the construction of the constructions were also constructed by the construction of the Sateens were in outstanding demand. The 36-inch constructions were also widely sought. Volume trading was also reported in narrow and wide odds. Standard twills came in for a fair share of the general activity. Prices CHICAGO

share of the general activity. Prices held extraordinarily firm.

Pratically all near-by goods in sateens were absorbed in the rush for sateens, and contracts on this class of materials were placed to run through the next two and three months. The bulk of the sateen business was done at 11½ cents for the 4:37s, and 10½ for the 4:37s,

at 11½ cents for the 4:37s, and 10½ for the 4:70s.

Nearly the whole range of 36-inch constructions was included the week's business. Full prices were accepted without haggling. Buyers seemed unusually eager to get spot goods, but even accepted short delays to place a number of orders. The rush of orders is attributed to the recent curtailment in production here, together with the firmness of the cotton market.

Current quotations on goods of standard construction follow: 38½-in., 64x60s, 8½c; 39-in., 56x44s 6%c; 27-in., 64x60s, 5%c; 27-in., 56x52s, 5c, and 25-in., 40x82s 3%c.

LONDON—It is now possible to see the effect on the market of the recent rise in the Bank of England rate to 6½ per cent. Yesterday, the bank, instead of continuing to pour out gold augmented its stock with a million sovereigns from Australia.

augmented its stock with a million sovereigns from Australia.

Since the bank rate was raised, exchange in the chief world markets has moved in Britain's favor. The French ratio has advanced 15 points. The New York rate is nearly one cent higher. While Berlin quotations are up four points.

Brussels, Amsterdam, Milan, Berne, Stockholm, Oslo, Copenhagen, Vienna and Warsaw also register rises. Even British funds show some recovery from the point to which they were pushed when the bank rate rise first became recognized as inevitable.

The conversion loan, for example, which touched 79 hast year and was actually raised, is now close upon 74. The 5 per cent war loan shows a similar though smaller movement, its maximum, having been 103½ last year. It was 101 when the bank rate was changed and is at 101½ now.

LEAD RECEIPTS AND STOCKS HEAD RECEIPTS AND STOCKS

HOSTON—Receipts of lead in ore by United States and Mexican smelters totaled 30,903 short tons (2000 pounds) in August compared with 81,531 tons in July and 77,095 tons in August. 1928, according to American Bureau of Metal Statistics. Total stocks of lead in the United States and Mexico amounted to 175,641 short tons on Sept. 1, compared with 173,549 tons on Aug. 1 and 156,976 on Sept. 1, 1928.

entire year 1928, totaling 672 engines, an increase of 11 per cent over the 12 months of 1928.

GRAND UNION CO. SALES UP
Store sales of Grand Union excluding per jobbing sales, for nine months ended Sept. 28, 1929, totaled \$24,281,442, compared with \$20,177,784 in 1928, up 20.31 per cent. Total sales, including jobbing sales, for nine months were \$27,440,754, compared with \$23,298,784, up 17.77 per cent.

TRAVELER SHOE CO. SALES BISE
The Traveler Shoe Company's sales for
the first eight months of the current
year were \$3.171.364, compared with \$2.8
803.266 for the same period of 1928, an
increase of \$368,098, or 13 per cent. Sales
for August were over 10 per cent ahead
of August, 1928.

The Break In the Market

During 1929 the stock market has had several violent breaks. In spite of this the shares of Federated Capital Corporation have steadily advanced in price, and have never declined.

In fact, these breaks in the mar-ket have been capitalized by the management into large profits, because they purchased securities at bargain prices. The shares of

FEDERATED CAPITAL CORPORATION

the well-known English type Investment Trust, are continually growing in value. One thousand ollars invested a year ago is today worth over \$1,800 and is growing rapidly and continuously

In addition, generous regular and extra dividends provide good in-come. Let us tell you the full story of FEDERATED. V. A. SEARS & CO. Sears Building, Boston, Mass.

OMAHA—Nebraska corn is safe from frost, says the Weather Bureau.

AMERICAN COTTON MOVEMENT

NEW YORK—The movement of American cotton into-sight was smaller this week than in the same week last year, according to the weekly report of the New York Cotton Exchange. The into-sight this week was 302,973 bales against 31,342 in the same week last year. The total into-sight during the season to date is 3,499,317 bales against 3,109,635 in the corresponding period of last season. AMERICAN COTTON MOVEMENT

WEEK'S REVIEW OF BUSINESS AND FINANCE AND FINANCE Security Crash Outstanding Development—Domestic Business Good While business has been pursuing the even tenor of its way, and general trade has shown improvement in most parts of the country, the finanters were firm to strong. The Paris Bourse showed strength at the start of the week, but stocks slumped on Tuesday, due chiefly to the unsatisfactory money situation at London. The Banc de France fell 425 francs and high-priced utilities and industrials dropped 10 to 125 francs. Rentes, however, showed strength. On Wednesday a recovery started and this was continued Thursday and Friday, with utilities favored. Dullness followed the recovery. The passing of Stresemann had an unfavorable effect, in view of the fact that the Young plan is not yet in effect. German stocks were generally depressed during the week, Buying orders were scarce and stimulating factors were lacking. Some firmness developed toward the end of the week.

most parts of the country, the financial world has riveted its attention on a tremendous decline in security prices, the extent of which has equaled if not exceeded many of the reces-sions labeled as "bear markets" in

sions labeled as "bear markets" in the past,
While bonds have shown an easier tendency, due to the continued high money rates, stocks have crumbled as readily as the high banks of a stream undermined by a siwft current. Measured by 30 industrial issues used in the Dow-Jones averages, the slump has approximated 57 points, and it has all occurred in the month since Sept. 3, when stocks reached their high point this year.

It must be borne in mind that bankers assert the bulk of the recent buying of high-priced industrial stocks has not actually been for investment, since the immediate return is negligible and the future has been discounted for from one to three years. It follows that stocks at recent high levels were unattractive, particularly as signs of irregularity in a number of industries were becoming more evident

industries were becoming more evi-

The increase in the rediscount rate The increase in the rediscount rate of 1 per cent in August was a strong factor against further inflation in stocks, though the market kept rising until the first week in September. Add to this the collapse of the Hatry issues in London, which brought with it much selling in the New York market the increase of the English bank. it much selling in the New York mar-ket, the increase of the English bank-rate and those of the Scandinavian countries, and finally as a more potent factor, the high cost of carrying stocks averaging between 9 and 10 per cent, and it would appear as if ample am-munition for the "bears" had accu-mulated.

Business Holding Up Well

There are many banking interests which feel that the present drastic drop in security prices is more in the nature of a technical reaction, and not

damage.

The volume of money turnover in the week ended Sept. 28 was smaller than in the preceeding week, but larger than a year ago, according to the United States Department of Commerce. Nearly \$56,000,000 of bonds were issued this week, compared with \$26,331,000 last week and \$66,173,000 a year ago. Bank clearings for the week aggregated \$16,749,770,000, an increase of 19.1 per cent over the like week a year ago.

Trade in Foreign Countries

is favorable. The Government is plan-

ning some large investments, which should help employment.

MEXICO—Good business prevailed throughout September, with gains shown by shoes, cotton goods and clothing. Fleeting southways as least the second southways and southways the second southways and ing. Electric equipment sales were satisfactory. Work on public improvements is continuing, with a construc-tive program outlined for 1930.

Leading Stock Markets n avalanche of liquidation struck New York market this week, and leading industrials slumped from 10 to 30 points, with the industrial average off 23 points for the week. The steady increase in brokers' loans to a record high of \$6,804,000,000, an increase of \$43,000,000 and the seventh successive gain, came as an unpleasant surpmise and led to the conclusion that stocks had been passing from investors and banking interests into the hands of speculators and margin traders.

England.

Olls were easy for the most part and coppers were lower. The shipping group recovered substantially toward the end of the week. Columbia Grapho-like period last year were 644,092 cars.

*Par unsettled. MARKET OPINIONS

ARGENTINA—Economic conditions in Argentina during September were generally satisfactory. Optimism has been growing because the drought ended with generous rainfall, textile demand is active and mills are expected to increase operation during October. Collections improved the last half of the month.

CHILE—There has been improvement in the general merchandlising situation here. Collections are complained of as slow and money is somewhat tighter. Securities have been declining to the lowest point of the year. Agriculture is in good shape and manufacturing continues at a high level.

DENMARK—A favorable trend in business and industrial activity has been noted throughout September. Most branches of industry are showing gains, notably shipping, foodstuffs, cement and vegetable oils, while slight improvement is seen in textiles and footwer. The agriculture is the following in the severage of industry are showing gains, notably shipping, foodstuffs, cement and vegetable oils, while slight improvement is seen in textiles and footwer. The agriculture is the following of the second of th

cement and vegetable oils, while slight improvement is seen in textiles and footwear. The agricultural situation is encouraging. The labor outlook is satisfactory, with all important wage agreements extended to 1931.

HUNGARY—Conditions are slowly improving in Hungary, though collections are still slow, taxes are heavy and heavy imports add to an adverse balance of trade. The harvest outlook is favorable. The Government is read to the second of the contraction of the contraction in activity seems in prospect for general business and this would have the concern in view of the unusual summer activity. crease of \$43,000,000 and the seventh successive gain, came as an unpleasant surpwise and led to the conclusion that stocks had been passing from investors and banking interests into the hands of speculators and margin traders.

The loan total is now \$2,000,000,000 above the aggregate of a year ago, and, while new financing may account for a good deal of the gain, opinion is that a tremendous amount of stocks have been bought at inflated prices on borrowed funds. Foreign selling may also have been a factor.

Nevertheless a sound credit situation means a substantial decline in

have been bought at inflated prices on borrowed funds. Foreign selling may also have been a factor.

Nevertheless a sound credit situation means a substantial decline in brokers' loans, and this in-turn means lower security prices. A drop of 57 points in the industrial averages since Sept. 3 may have corrected the technical position to a considerable extent.

In London, stocks have pursued an irregular course. Gilt-edge securities which were uneven to lower at the start of the week, showed a firm tope at the end of the week, due in part to lower rates on call funds. These were as high as 6½ to 7 per cent on Monday, but fell to 4½ by Thursday, due to recent borrowings by the Bank of England.

Olls were easy for the most part and content were easy for the most part and content where are not stock.

It is only in the last decade that the utility company has come into its own, so far as the esteem of the public is concerned.

standing amounts to 498,644 shares. The new common is not yet on a dividend basis.

Net earnings of U. G. I. have ex-

The suspicion directed against gas, electric, traction and telephone companies, a sort of aftermath of the 1922, to \$7,861,323 in 1924, to \$8,600,381

panies, a sort of aftermath of the "trust-busting" days, has largely been dissipated.

Educating the people as to the rights and duties of big companies rendering a necessary service, constantly disseminating data regarding growth, costs and various problems, and stead-like distributing stock to employees and tread-like distributions. costs and various problems, and steadily distributing stock to employees and the public have made friends for the public utility and placed it on a favored eminence where it is receiving the strongest kind of investment the strongest kind of investment to strongest kind of investment t

favor.

Among the public utility issues which has received a good deal of attention, and which has shown a striking appreciation, is United Gas Image and Company common stock, by \$46,725,525 which becomes payable for United Gas interest in General Gas & & Electric sold to Associated Gas & Electric.

Then, too, the proposed sale of new stock this quarter will bring in about \$40,000,000 more. Thus a sum of close to \$90,000,000 more will be available this year for expansion purposes. in 1927, and 1111/4 in 1928, and could be had around 26 in 1920, recently sold at the equivalent of better than 260, considering the recent split in which five shares of new common and % share of new \$5 preferred were given for each share of old stock.

This company has become one of the leading public utility holding organizations in the country, with a capitalization of approximately \$200,-000,000, and a market value placed on its common and preferred stock of approximately \$1,000,000,000.

The company's ambitious plans have The company's ambitious plans have made it one of the dominating utili-

ties on the eastern seaboard, with its tive markets for commodities, as well chief holdings in New York and Penn- as securities, there is a slight upward as securities, there is a slight upward trend visible in wholesale and jobbing As realignments of utilities in the trade, and retail trade has shown ever East are still going on, no definite or light trade-name trade has shown ever better advancement, this despite early high transportance. limited goal for the company can be set, but its close association with and holdings in American Superpower Corporation, Commonwealth & Southern Corporation, Niagara Hudson Power Corporation, American Public Utilities Company, Midland Utilities Company, Chicago, Ill., Southeastern Power & Light Company and Public Service Corporation of New Jersey assure it in the East of a prominent "place in the sun." ticularly noticeable in the so-called heavy lines, steel and iron especially, because a slight increase in operations has, been noted at western centers, where the beneficial effects of recent

Powerful Banking Sponsorship

United Gas Improvement Company was started in 1882 as an engineering and construction enterprise, capitalized at \$2.000,000. Before long, its activities spread into the investment and man-agement fields. It bought interests in various gas, street railway and electric mpanies, and its history became one of constant growth. Backed by stanch investment houses, it has concentrated its activities largely in Pennsylvania, New York, New Jersey and Connecti-cut, one of the most thickly populated and most highly industrialized areas in NORTHWESTERN BANK COMBINES
CHICAGO—President Kasten of First
Wisconsin National Bank said of the
bank corporation being formed by that
bank: "Its purpose is to protect Wisconsin banking against encroachment of
other chains, or any other holding group
that plans to enter the State. It is not
a First Wisconsin National Bank project;
it is a Wisconsin affair. Developments
have indicated organization of a 'chain
group in the State was inevitable, and
most Wisconsin banks preferred to have
the control remaining within the State." country.

he country.

Not long ago, representatives of the lims of J. P. Morgan & Co. and Bondright & Co., Inc., were added to the of directors, which already ounted among its members officials counted among its members officials of Drexel & Co. and Girard Trust Company, Philadelphia and Mellon Na-tional Bank of Pittsburgh, Pa.

In the last three or four years, the company has practically tripled its holdings of utility securities and greatly enlarged the territory in which it operates. Early in 1928, through an exchange of stock, it obtained about 98 per cent of the stock of Philadel phia Electric Company, a company with assets in excess of \$250,000,000 operating revenue last year of \$43, 833. This has been the largest single

laboratory tests now is being applied in a 50-ton machine built expressly for commercial test purposes. Its simplicity, extremely low cost and ability to freat large tonnages rapidly are indicated in tests on various kinds of ores. The solution used is acetylene tetra bromide. It is a product of the Delaware Chemical Engineering Company of Wilmington, Del. Company operating in Indiana. In 1925 it became part of a syndicate which obtained control of the Indiana Service Company, operating interurban lines and furnishing light and power in various cities and towns of Indiana.

In 1925 also it enlarged its holdings in Connecticut, where it holds about 80 per cent of the Connecticut Electric Syndicate. In the same block of Mobile a subset of the Connecticut is a subset of the Connecticut in the same block of Mobile 200 in the common of the Connecticut in the same block of Mobile 200 in the common of the Connecticut in the same block of Mobile 200 in the common of the Connecticut in the same block of Mobile 200 in the common of the Connecticut in the same block of Mobile 200 in the common of the completed statistics for September and the third quarter confirm the indication that the insolvency record for he United States would make a relative favorable exhibit. cut Electric Syndicate. In the same year United bought a substantial block of Mohawk Hudson Power Corporation. It increased its Mohawk holdings in 1926 and 1928, so that at the end of the latter year, it held 458,-876 common shares of that concern or a 28.8 per cent interest.

Controls Big Engineering Firm

Controls Big Engineering Firm

It merged with the American Gas
Company, Pennsylvnaia, in 1925. In
1926 and 1928 it increased its holdings
of Public Service of New Jersey stock,
and by the end of last year the company held 1,582,958 common shares of
the New Jersey corporation, or 32 per
cent of total outstanding. United Gas
bought 25,000 common shares of the
Northeastern Power Association in
1926, and by exchange of securities ob-1926, and by exchange of securities ob-tained substantial blocks of debentained substantial blocks of depen-tures, preferred and common stock of the Southeastern Power & Light Com-pany, operating largely in Georgia. The company owns a majority in-terest in the Welsbach Company, manafacturer of gas mantles, heaters, amps, electric refrigerators, etc. With lamps, electric refrigerators, etc. With the Public Service Corporation of New Jersey it owns the United Engineers & Constructors, Inc., which in turn controls U. G. I. Contracting Company, Philadelphia; Public Service Production Company, Newark, N. J.; Day & Zimmerman Engineering & Construction Company, Philadelphia, and Dwight P. Robinson & Co., Inc., New York City. The field of engineering and construction bids fair to become increasingly important to U. G. I., as indicated by the \$68,000,000 of work completed by United Engineers in 1928, with incompleted work under contract

with incompleted work under contract at the beginning of this year in excess

at the beginning of this year in excess of that total.

The Philadelphia Gas Works, owned by the city of Philadelphia, the Northern Liberties Gas Company of Philadelphia and Erie County Electric Company are operated by United Gas under profitable agreements.

There is close association between United Corporation, sponsored by Morgan-Drexel-Bonbright interests, and United Gas Improvement. As of May 4, when the former concern closed its offer to exchange its shares out of 3,946,-017 U. G. I. shares outstanding, or 18.7 per cent. It is believed in utility circles that United is desirous of increasing its interest in U. G. I.

Earnings Expand Steadily

Earnings Expand Steadily

Earnings Expand Steadily
For the last three years, the company has had only one class of stock. But in May, 1929, the directors authorized the conversion of the \$50 par stock into \$5,000,000 no par common shares and 5,000,000 \$5 cumulative preferred shares, on the basis of % share of no par preferred and 5 shares of no par common for each share of \$50 par stock. It was vote1 also to allot one new common share at \$20 a share for each 10 held to common stockholders of record Oct. 31. This change was approved at the stockholders meeting Aug. 27.

Aug. 27.

The split-up caused the issuance of 13,945,745 common shares, to which must be added the 1,994,574 shares oftered as a stock allotment, bringing outstanding common after Oct. 31 to 21,940,318 shares. Preferred stock out-

VERY year the teachers in a

A large mail-box is provided in

each classroom in which the children drop their valentines. Then a

"mailman" is selected from each room to deliver them to the chil-

This year the children in John's

class were all eagerly waiting for the day to arrive. All, that is, except

one little girl, daughter of an immigrant family, who seemed to be

very unpopular with the others in her room.

John had just finished making 25 attractive valentines with the ma-

terial his grandmother had sent him,

when his mother came into the room.

"Mother," he said, "I want to tell you what I've been thinking while I

was working here. You remember the little girl I told you about after

our last party—the one who never has received any valentines? Well, I just thought I'd send her some this

year to make her happy."

Mother, of course, was pleased with

such thoughtfulness. Then she watched him select four or five of

his largest and prettiest valentines, half expecting them to be addressed

to his particular friends, but, instead, John wrote the foreign name in

disguised handwriting on them all. John could hardly wait to get home

certain school allow the chil-

dren to have a valentine party.

Who: EDWIN A. ABBEY.

Where: The United States and

When: Nineteenth to twentieth

Why famous: An American artist

whose connection with artistic cir-

cles in England caused him to be as

well known there as in his native

land, Americans commonly know him

through his frescoes, entitled "The

authors, as a water-colorist and worker in pastels, and as the super-

visor of those historical mural paint-ings which line the Peers' corridor

Abbey's career began as unobtru-sively as did that of many another

American boy who was later to be-come famous. A Philadelphian born, and early showing an artistic flair, he was sent to the local Academy of

Fine Arts. By the time he was 19 his progress was so marked that a posi-tion was offered him with the pub-lishing house of Harper & Brothers, New York. Installed there as illus-

trator, he worked in the company of Howard Pyle, Joseph Pennell and

dramatic quality as well as for its rich and brilliant color treatment.

A Word a Day

Obtain

There is a very fine distinction be-

tween this word and "get." In "ob-

tain" the keynote is the idea of hold-

ing, as it is derived from the Latin

ob, "near, close to," and tenere, "to

hold." The word "get" is used promis-cuously for whatever comes to hand, whether good or bad, sought for or not, while the word under considera-

tion includes the wishes of the agent.
"To obtain" implies effort. What-

sult of serious and sometimes pro-longed struggle. It indicates success,

but from the very makeup of the word it is apparent that to be con-

watchfulness and work. It should be

Brevities

A Puzzle for Young Artists

Draw the Picture of an Artist

Draw lines very lightly until the picture is completed, then trace lines heavily, rounding edges, using your own ability in finishing, and you will be delighted with the result.

school. I am interested in all sports including hiking, and am also a "bookworm." I have a fox terrier called Clipper. He is my only pet.

Kentucky. I surely think that it is I shall be glad to hear from girls anywhere. Menlo Park, my home, is about two miles from Palo Alto, and Stanford University. Beatrice S.

for walls. The camp is open for six held the last week in September, which consists of grain exhibits and On the road there is a redwood called the "chimney tree" because the middle is hollow. You can go inside a seating capacity of 4000 and the it and look up and see the sky, yet outside is decorated with corn and the tree is still growing.

I have made two lovely friends Kentucky. I surely think that it is a most wonderful way to make friends in all parts of the United

The school from which I have just graduated, has a Latin Club spon-sored by one of the teachers. Only students taking Latin are eligible to join. One would naturally think that it would be very uninteresting, but the sponsor makes it so inter-esting that the boys and girls who have joined it want to help plan the programs and improve the constituion. Trips are made once a term to the Classical Center, which is a room maintained in the Chamber of

Commerce Building used solely for Greek and Roman exhibits. When the students go down there, they are given the privilege of looking through old Roman books, scrolls, costume plates, and lastly, they are shown slides of Roman wonders and old buildings. This trip usually comes near the end of the term so the members have some-thing to look forward to.

Another feature of the club is the Roman banquet. At the first one the menu and program were in the form of scrolls tied with purple rib-bon. The honor guests were the principals of the school. The club's second term was marked with a banquet given in December and the decorations represented a snow scene. The third banquet represented the marriage of Peleus, King of Pythia to Thetis, a sea nymph.

Pictures of fish adorned the walls to give the desired submarine effect. At the December banquet the honor and the superintendent of schools I should appreciate letters from girls of my age (13) anywhere. I am interested in music, swimming and various sports. [Thank you for telling us about your Latin Club, Lucile.—Ed.]

The following would like to receive letters:

Each member of said Editorial Board shall have equal responsibility and duty.

All communications regarding the conduct of this newspaper, articles and illustrations for publication should be addressed to The Christian Science Monitor

EDITORIALS

For a World Entente

S EUROPE'S cherished new house of cardsthe post-war balance of power-so laboriously constructed, so nicely adjusted, to be toppled over and swept into the discard of international politics by an Anglo-American alliance? That is the question of the moment in continental chancelleries-apparently a profoundly disturbing one in some of them. The apprehension is understandable. But the better it is understood the less justified it appears.

Entirely natural it is that European statesmen should be a bit taken aback by the celerity and ease with which America and Britain come, not only to a solution of a seemingly insoluble disarmament problem, but to a cordial and full understanding of each other's needs and purposes. The old diplomacy stands agape at such frankness, such trustfulness, such real friendliness, while Mr. MacDonald and Mr. Hoover camp beside the Rapidan.

Moreover, Mr. MacDonald has made it clear that there is no longer a British entente with France. "But," argues the European, "Britain will not stand alone; there must be an entente -ergo, it must be with the United States. Understanding means entente, and entente

means alliance. "Yes," says another who wishes to view with alarm, "think of the tremendous power of such a combination! Why, an English-speaking league would completely overshadow the League of Nations! It could block all sea trade and would possess 90 per cent of the world's mineral supplies." The very size of this conjured shadow makes it appear nearer to those

willing to see a ghost. But is it? No! In so far as any binding alliance or any understanding directed against other nations is concerned, assuredly No! Both have too many separate interests, both are too closely related to others in the family of nations to form an exclusive partnership. Only the skill of a Hoover and a MacDonald in interpreting the two peoples to each other has made the present rapprochement possible.

Perhaps it is not so much the supposed possibility of a formal alliance as it is this newly emphasized ability of Britain and America to understand each other that alarms the continental statesmen. That is a very real thing, far more important than any alliance or treaty. Treaties are only as strong and lasting as the desire of the signatories to carry them out. The strength of the imponderable ties forged by common language, law and literature, similarity of racial history and political ideals is seldom realized. But the inherent sympathy between the two great English-speaking political groups holds no threat to any nation.

Why not? it may be asked. Perhaps the best answer is that it does not because it never has. The condition is not new; the underlying ability to understand has long existed, and never has it been used to upset the world balance or overawe any country. Moreover, both peoples are too politically wise, too discerning, too well guided by their own enlightened self-interest to ever believe that any partnership formed to dictate to their neighbors and customers could benefit themselves.

Again, it must be realized that the days of international freebooting, of land-grabbing wars, are over. All that Britain or America could gain from an alliance would be the assurance of help in maintaining the peace, but today the League of Nations is doing a good job of keeping the peace, while under the Kellogg pact fifty-four nations are pledged not to break it.

No one, American or European, should read into the personal conversations of Mr. Hoover and Mr. MacDonald any secret move against other nations. It must be remembered that British leaders habitually meet continental statesmen in friendly converse. Mr. Lloyd George played golf with M. Briand, Mr. Chamberlain has lunched with M. Poincaré, and Mr. MacDonald has walked with Dr. Stresemann. If the heads of the British and American Governments are removing obstacles which have divided the countries and are strengthening the ties which have drawn them together, they are serving interests of all nations. For in such increases of understanding between countries such additions to the general fund of friendship, will be found the nuclei for that wider understanding which will include all peoples in a world entente.

Railroads' Boon to Business

FAST transportation plays a major part in American prosperity, not only by reducing the goods tied up in transit with interest charges accruing, thereby making possible the now common practice of "hand-to-mouth" buy-

ing, but also by increasing productive activity. When the Pennsylvania Railroad orders 310,-000 tons of steel rails, as it just has, representing an expenditure of perhaps \$21,000,000, and the Chicago, Milwaukee, St. Paul & Pacific Railroad orders 60,000 tons, it is indicative of the orders which the steel companies will receive from all the railroads for delivery next year. Similarly, the New York Central has ordered, within a relatively recent period, \$9,-000,000 worth of electric locomotives for freight switching service in New York City, which is similarly a typical evidence of the volume of business which locomotive builders may anticipate. Railroads have not bought many freight cars in recent years, and it is thought that heavy replacements of this type of equipment must be made shortly, thus producing activity in the car-building plants, in which a depression

These railroad orders in turn result in large orders for the supplies which enter into the equipment thus purchased, stimulating activity in correlated industries which extends into businesses wholly remote from the field of railway supplies, as such. Workmen are kept busy and their purchasing power in turn adds to the general prosperity. To ascribe national prosperity to the railways is somewhat chimerical, yet when the railroads begin buying in huge lots, it augurs well for business generally.

Merging Enforcement Units

WITH that facility for co-ordination and unification which he has previously manifested in innumerable instances, President Hoover has, thus early in the first year as Chief Executive of the United States, moved definitely in the direction of solidifying and strengthening those administrative agencies designed to bring about an effective enforcement of the Eighteenth Amendment. His most recent act in this respect is the appointment of his friend and fellow townsman, John McNab, a San Francisco lawyer, to outline, in co-operation with others, a plan which will insure a more nearly universal regard and respect for the law.

It is indicated from the outset that the effort will be to unify or merge the separated enforcement units and to place them under the direction of the Department of Justice, at the head of which is the Attorney-General, William D. Mitchell. Thus it is to be made possible, in dealing with alleged violations of the law, to hold the prosecutors in the federal courts individually responsible for the procuring of evidence in the first instance, and for the indictment and trial of accused offenders. Mr. Mitchell's approval of the proposed arrangement indicates his willingness to undertake the additional responsibility which will be his.

As one measures the progress which has been made since President Hoover took office in arousing public sentiment in support of law enforcement, and in preparing the way for a determined and unified attack upon the violators of the law, reassurance is felt that an appreciable improvement in prevailing conditions will soon be noticeable. Thousands of persons in the United States will yield more ready obedience to the law when it is realized that its violation is not being metaphorically winked at by those whose sworn duty it is to observe and enforce it.

There has been gained by persons in some sections of the country the impression that violation of this particular law is fashionable, and therefore that it can easily be condoned. Mr. Hoover, as part of his program, proposes to make disobedience extremely unfashionable in and around Washington. Mr. Mitchell, charged with that duty, will do his part in convincing the vicious and careless nonobservers elsewhere. Mr. McNab, an expert in the kind of work to which he has been assigned, will adjust the machinery, aided by those in full sympathy with the

Which Way, Jugoslavia?

ALTHOUGH there is no confirmation of the report that King Alexander of Jugoslavia is about to give up his dictatorship and restore some form of parliamentary government, ground is not lacking for the belief that a defiite change is impending. The dictatorship has not made the progress that was expected when it was established last January. It has now run eight months, not long, it is true, when compared with other European dictatorships, but a sufficient length of time to show results.

So far it has succeeded in stifling opposition. It has banned political discussions in the press and in public. It has stilled the agitation in Croatia, but the movement for a measure of autonomy is far from being extinguished. It has deprived the peasant of one of his pet diversion's in forbidding him to enter freely into an exchange of opinion on the affairs of state. And it has carried the Triune Kingdom little farther on the road to unity, the chief purpose for which it came into being. With such negative results, the dictatorship is hardly likely to continue for any

length of time. True, it has brought a certain amount of stability in the country. Yet, economically, Jugoslavia is far from being out of the woods. It needs financial assistance in building ports and improving communications. And the powers desire to render all assistance, but that assistance is contingent upon the Kingdom of the Serbs, Croats and Slovenes displaying unity in something more than in name.

Brokers' Loans and the Market

MANY followers of the stock market have watched with misgivings the increase in brokers' loans during the last few weeks. Adding to the uncertainty of the situation has been the fact that time after time Wall Street has expected a decline, only to find on each Thursday afternoon when the figures were announced that there had been a further increase of a hundred or more millions. Week after week a new record has been established, and today the total is so much larger than was formerly considered reasonable that not only laymen, but financial experts, hardly know what it is all about. To some, even the present volume is not looked upon as a basis for concern; to others, equally expert in interpreting financial conditions, it is a sign of danger ahead.

How will one account for the growth? That is what so perplexes stock market commentators. In general, only three causes are recognized for an increase of brokers' loans. First, if there is an active market in which prices are rising, the volume of loans is almost sure to advance, because the increased prices at which the securities change hands necessitate a larger margin with which to carry them. The second cause is the passing of securities from those who trade on strong margins to those whose margins are less. This usually means that the stocks are being taken by the "public" as contrasted with professional traders. Finally, if there is a large volume of security flotations, or if "rights" to subscribe to stock are maturing, an increase is likely because additional funds will be required to "carry" such issues until they are absorbed.

But none of these causes furnishes a satisfactory explanation of the recent growth. The market has been only moderately active and, with few exceptions, prices have not been advancing. The second possibility is no more helpful. The general character of the buying has been that of strong professional traders, rather than that of the "public." This leaves only the possibility of security issues and the taking up of "rights." At most, however, this can only partially explain the increase of some \$800,000,000 in brokers loans within six weeks.

As a matter of fact there have been various other disturbing elements in the stock market of late. Business activity, while remaining at a very high level, has recently given some indications of falling off. Outstanding among these have been the reduction in automobile productionwhich necessarily affects a long line of activities and the decline in the volume of unfilled orders for steel. Taken as a whole, these unfavorable signs do not amount to much, and under more normal conditions would not get much attention, but at present the public is peculiarly sensitive to such changes and takes fright very easily, a condition which accounts, at least partially, for the market's recent sharp reverses. Until a more definite trend one way or the other is discernible wise investors will watch with particular care their commitments in the

Why Not Speak the Language?

AS THOSE who travel admonish the stay-athomes, it is perfectly possible to go about a foreign city and yet have no word of the language. Witness the achievement of an American who was staying recently in Paris. Complacently he made his way hither and yon, and that, if you please, without recourse to the taxicab, favorite refuge of the linguistically timid. Heroically he went in an omnibus. And his success was due to the following exquisitely simple system.

Seated in the vehicle, he would say gravely to the conductor: "Terminus." Whereupon, having paid the uttermost fee which the company may exact, he was in conscience free to alight wherever he pleased.

When it came to the return trip, he brought forth another magic word, "Opera," his hotel being situated close by that celebrated landmark. Behold, the thing was done and with two short words, neither one of which was originally

But how incalculably much one misses by not being able to read signs, overhear conversations, interrogate the valet de chambre, the waiter, the cathedral guide, the modiste. It is true that English is spoken by the salespeople in the big shops, by the concierge, by those occupying most of the conspicuous posts. On the other hand, what if one wishes to weigh the rival advantages of a fauteuil vert où jaune at the open-air concert in the Tuileries Gardens? What if one has forgotten his way to the Dresden Gallery, where the Sistine Madonna is treasured? Or, as often happens, suppose that to follow the Italian of the English-speaking chauffeur at Siena is less of a strain than to follow his well-intentioned

Then what a gratification to address each in his own tongue, what bliss when comprehension dawns in their eyes. Nearly always they receive the stranger's clumsy effort in good part, as a courteous gesture, an indication of his willingness to conform. More affable relations are at once established. In the ideal society, of course, there will no longer exist such guages, customs, moneys and passports. But until then international friendships may be fostered if only prospective travelers will familiarize themselves to some degree with the languages of the peoples whom they intend to visit.

Editorial Notes

Today's traffic problems bring into pleasant relief a city ordinance of Boston in 1835, forbidding the parking of any vehicle, passenger or commercial, for more than 15 minutes "in any of the Streets, Lanes, Alleys, or Public Places of the City, either with or without a team or driver, without a license for that purpose from the Mayor or Alderman first had and obtained, under a penalty of no less than one dollar nor more than twenty for each offense." And we had supposed all the time that parking limits were the product of the motor age. We are now prepared to discover that Cæsar was once fined twenty denarii for going past a red stop light.

The news that photos may now be taken by radio will no doubt be welcomed by many photographers and parents who have expended hours of patient toil abetted by ingenious toys in the effort to get the small tots posed. Now it should only be necessary to let the baby play around the cabinet, and when in its most pleasing natural pose, press the button, or whatever is done, and snap it.

When the Presidents' yacht, the Mayflower, is sold, it is to be with the proviso that it may never carry liquor on board. Its future crews may recall the lines in "Pinafore," which run:

For we sail the ocean blue And our saucy ship's a beauty, We are sober men and true And attentive to our duty.

With a yearly saving in the United States of 550 tons of paper and 500 tons of ink, through reduction in the size of currency, there is little likelihood of "cheaper money," but the example in economy surely ought to be worth something.

With the development of a river towboat with caterpillar tread, for use in shallow water, one wonders how long it will be before "butterfly wings" will be added for use in towing airships into an airport.

The old order changeth. How long since you heard of a man named Ebenezer, or a woman named Tabitha, or a dog that would respond to Fido, Rover or Prince?

Reports show that Americans are buying more automobiles than they are furniture. Some people just about live in their cars anyhow.

Making the Grades Through Bosnia

T WAS the dancing teacher who saved the day. I don't | know what we'd have done without him. Of course I don't mean to say that he had us all waltzing and foxtrotting in the tiny compartments of that narrow gauge railroad train puffing through the Bosnian woods. But he entertained us so well that we forgot to get bored. He kept our morale up and our thoughts advancing

was on a Thursday that we took the trip. And would have had to be on a Thursday or a Sunday, for those are the only two days on which the little train deigns to run. It is a private train. We were meandering through the lonely, magnificent mountains of west central Jugoslavia on a private train. In private cars. But not in our private cars. All of the regular, full-grown railroads in the country belong to the state—as do most of the narrow-gauge lines, too. But this one does not

It is the private property of a lumber company and we constructed to transport enormous tree trunks from the wooded mountains of Bosnia to the main line leading to the Adriatic Sea and the outside world. It carries passengers as a special favor—that is, when there isn't too much snow on the track—and if you accept the favor, it is like catching a ride in the one-hoss shay. You may walk if you prefer and nobody's feelings are hurt, but if you do decide to ride you mustn't grumble at the buggy for not being a high-powered, comfortable motorcar.

It was in the town of Jajce that we got on our little train. And I feel sure that you can't pronounce that name. It's Yaeetse. And a beautiful place it is. It has a good hotel over a grand waterfall, old walls, a myriad of mills with fast-whirling stones revolving in rickety flour-covered shacks squatting in the middle of foaming rivulets; it has ominous old towers, fortresses of all ages, and a large and mysterious double-storied, cross-shaped cave, carved out of a solid subterranean rock ages ago by some persecuted sect, the courageous members of which, gathering there to worship, have left the walls and ceilings dark with smoke from candles and pine knots.

It was 5 a. m. when we walked down to the little station. led by a stalwart boy who carried our baggage on a wheel-barrow. A kind and enterprising woman served us with refreshment in a clean little narrow gauge lunchroom not so large as the boxes in which they pack small automobiles when they send them over the ocean. Our baggage boy acted as our guide and friend and found places for us and

our luggage in the two private cars. We all had third class tickets, for there was no other kind, but even here there seemed to be a sort of unwritten social law which rigorously enforced itself. In any case, those of us who wore white collars and fragile dresses were given one car and the less dressy folks were crowded into the other one. Of course the dancing teacher was with us white-collared people. He, in fact, was the prize passenger—with a real leather suit case, a portable phonograph and an excellent shoe-box kunch. He had learned how to get happiness out of each day, wherever he was, and to give happiness.

It was as though he had invited us to a party. The first thing, naturally, was the "ice breaking," for we were all strangers to one another. But we didn't remain strangers long. As soon as the train jerked away from the station he put the very popular eng, "Valencia," on his machine, and he soon had us in that world where everybody knows everybody else. The lady next to me on the right was a sort of storekeeper and mail carrier. She had any number of little packages which she laft with acquaintances at the stations as we came to them, and when she got off she still had a good supply of bundles left for her store.

She was fuite intent on her business and didn't think so much of our party, but was good-natured. On the left of me sat the belle of our ball and her mother. They were very well dressed and apparently were not accustomed to traveling on lumber trains. You might say that they were the "patrons" of our entertainment, adding dignity and grace to it.

And our dancing professor knew exactly how to address himself to such guests. He always called the lady "Milostiva," which not only means "Your Kindness" or "Your Mercy," but has a very gracious sound of its own, regardless of its meaning. Anyway, it was a most captivating and romantic thing for a lady to be given a title

there in that little box car, whatever the title might mean. Then there was another vivacious young woman and her brother and the chum of the dancing master.

After the social "ice breaking" was over, our selfappointed host set out to do a little real ice breaking, that is, to warm the car, for although it was late in the spring it was a capricious spring, shivering with winter; and besides we were in the snows of the Bosnian woods. Our dancing professor jumped over the back of our seat and tried to invigorate the fire in the wood stove in the middle of the car. But the fuel was wet and in spite of his much blowing it burned very slowly.

At each of the stations I got off and brought in chips and dry sticks from the railroad wood pile and in time we had so much heat that we were all roasting, except the "Milostiya," and even she got red. Our professor was very busy and very happy in keeping the windows shut, the fire roaring, and the phonograph going. He also said many clever things and ate a part of his lunch.

We went bravely up hill after hill, but before we began the great ascent we discovered that we had a hot box. That seemed to be worse than a punctured tire, for it couldn't be fixed. So our car was detached and we were all shoved into the other one with the peasant folk.
"Milostiva, you mustn't mind this," said our dancing

teacher. "This is what gives traveling a thrill. Anybody can ride in a sleeping ear, but it takes a real traveler to enjoy this." The kind lady and genial daughter agreed, and no one made any complaint.

Then we started up the last long, steep grade. On one side we saw a deep, rocky valley, at the bottom of which flowed a river that literally gushed, foaming, out of the mountain side. In another direction stretched endless pine forests filled with deep snow, which the spring would leave for the summer to dispose of. It was a magnificent country to ride through slowly in a little car behind a brave little engine.

But suddenly we stop. No station in sight. Something is the matter. Can it be that we have another hot box? If so, woe unto us, for we have no other car to pile into, and we can't all get onto that little engine. We hastily ask the conductor what the trouble is and he says, "Oh, we're just waiting to get up steam." A languorous tango on the phonograph makes the time go more agreeably.

Pretty soon we start again. Then we stop again to steam up for the final effort. Once more the engineer opens the up for the hnal effort. Once more the engineer opens the throttle and slowly, slowly we near the top, chugging through dense woods. "Why, there are bears here!" exclaims the gracious lady to the entertainer. "The workman sitting by me just told me." "Well, don't be afraid, Milostiva, I'll keep them away," answers the dancing master gallantly. "Oh, I'm not afraid; I was telling you the news." "It'd be news if we saw one," he says, as he puts on some jazz to help us along. jazz to help us along.

It is now noon and in a few minutes we go over the top. The cleared place in the forest widens out and a station, appears. Our entertainer gathers up all his baggage and gets off. He says there's a town some place in these woods where he's been invited to give a course in dancing. Our car seems dull. We travel on another hour and the "Milostiva" and her daughter get off. There's no more gayety left. Only hunger. By 4 in the afternoon we get to a wider gauge branch line and I succeed in buying a sandwich. At 10 that evening we reach the main line and then halt for the night at a bustling little city, Knin, with hotels and auto roads and a full-sized railroad track. Again old fortresses, newspapers, food to eat, conveniences and civilization. It is a joy to be out of the wooded wilderness, to see prosperity and gardens and blooming trees, banks

and schools and grocery stores. Back there all was primitive and lonely. Men carried their grain on horses' backs, watched sheep and goats in mist-covered mountains, ate black bread and a little cheese, worked for 25 cents a day and, living in barren huts, aspired to little but a bare subsistence.

Yet some of them are learning to waitz and tango, and as I think of that long day's ride through Bosnian woods, I call to mind the lake of the fox trot, the two-step gorge, the springs of the waltz, the "Valencia" grades and the the springs of the waitz, the valencia standard tango peak, and I wish the professor many equally joyous R. H. M.

From the World's Great Capitals-Rome

IGNOR MUSSOLINI'S connection with the Palazzo Chigi came to an end with his resignation from the post of Foreign Minister. In the Palazzo Chigi the Italian Dictator has worked for almost seven years; the window of his office, overlooking the Corso, was invariably shown by Fascist guides to tourists as one of the interesting "sights" of modern Rome. In the beautiful and large Hall of Victory, so called because of a statue representing a winged Victory placed on a table in the center of the hall, Signor Mussolini received daily statesmen and other visitors, and in this hall the many pacts of friendship concluded by Italy during the last seven years were signed. The palace contains an interesting gallery of original pictures by famous artists, although no one ordinarily is allowed to visit this gallery. On three or four occasions official receptions were held in the stately hall of the Palazzo Chigi, and those who were privileged to attend them were amazed by the magnificence of the decorations and the beauty of the pictures. ,

The official residence of Signor Mussolini and of future Prime Ministers is now at the Palazzo Venezia, the beautiful building overlooking the piazza bearing the same name and only a few yards distant from the Capitol. The palace, which stands on the site once occupied by a public villa in the Republican Age, is said to have been built of stones taken from the Colosseum and the Temple of Claudius, and is one of the most imposing structures of Rome. Its history is intimately connected with that of Rome since the fifteenth century. Popes and emperors have lived in it; for over two centuries it was or by the Venetian ambassadors to the Vatican. In 1815, after the fall of Napoleon, it passed into the hands of the Austrian Government, who held it for exactly a century as a residence for their diplomatic representatives to the Holy See. In 1915 the Italian Government took posse of the palace, replacing once more the lion of St. Mark on its façade. For some years it has been undergoing important and urgently, needed renovation, and th palace has now been completely restored to its original grandeur and beauty. In the palace are housed many outstanding works of art, and the rich collection of pictures and furniture has been left intact. Signor Mussolini' office will be in the Sala del Mappamondo, a gorgeous hall restored to its ancient splendor by Professor Hermanin.

A tablet has been unveiled in the small village of Segno in the valley of Non (Upper Adige) in memory of her distinguished son, Father Chini, the famous explorer of North America, who in the second half of the seventeenth century discovered California, Colorado, Arizona, the River Gila, the Rio Grande and other important places in the southwest and who, moreover, made the first map of these new lands. Two important books of Father Chini's discoveries have recently been published in the United States, and a monument to his honor has been erected at Tucson, Ariz. The ceremony at Segno was attended by the civic authorities and by a large number of people from the near villages.

Additional interest has been given to the seventeenth biennial art exhibition to be inaugurated in Venice in March, 1930, by the official announcement that the United States of America, for the first time, will have its own pavilion at the art exhibit. American artists have often exhibited their works at the Venice biennial exhibition but they have done so individually, generally in the British pavilion, while all the other important countries have

pavilions of their own. The well-known Italian sculptor, Antonio Maraini, the secretary-general of the Venice exhibition, is to be congratulated for having induced the Grand Central Art Galleries of New York to build the pavilion. An American architect, Maj. Chester Aldwich, been sent to Venice, and has already submitted to the exhibition committee the project of a pavilion for the combined American artists. The project has been approved and the construction of the pavilion will begin at once, so that it may be ready before the next exhibition is opened. The pavilion will be built in the colonial style of the eighteenth century, with the contrasting stone and brick construction.

Fresh incidents on the Italian Alpine frontier, where some foreigners were recently arrested by the military authorities for contravening the frontier regulations, have led the Italian Alpine Club to publish detailed information in regard to mountaineering on the Italian frontier. While for "open passes" the regular passport is the only document required, the other Alpine passes, peaks, valleys, etc., cannot be crossed without a special transit permit. This permit can only be obtained from the Italian prefect nearest to the local frontier, and not from Italian consuls abroad. Moreover, visitors to the Italian frontier zone are strictly forbidden to use photographic and cinematographic apparatus, or to make any drawings or sketches. panoramic or other, without previously obtaining special permission of the military authorities. In order to prevent undesirable visitors from entering secretly into Italy, or anti-Fascists from leaving their country, the Italian frontier is very strongly guarded by Black Shirts, and to avoid unpleasant incidents all foreigners should obtain exact information on the special documents or other permits required by Italian law for crossing the frontier. 1 1 1

The Duke of Spoleto, the leader of the Italian expedition exploring the Karakorum, has telegraphed from Askole to Signor Mussolini that the expedition has obtained all its objectives. "Our work on the Baltoro glacier has ended and we have, therefore, left the base camp of Kdokas. In the course of our explorations we have been able to recognize the gap noted by Conway at the extreme east of the Baltoro glacier. We reached a height of 19,685 feet. A member of the expedition has explored the Pumah glacier. Scientific researches will be made on the return There is great satisfaction in Italy at the success of the expedition which has been financed by the city of Milan. Part of the territory explored by the young duke had previously been visited by his uncle, the Duke of Abruzzi, in 1909. The report of the duke on the geo-graphical and geological surveys of the unexplored section of the Karakorum is awaited with great interest.

A new civil air line has been established between Milan and Rimini, a bathing resort on the Adriatic coast mostly frequented by Lombard people. The service is at present twice a week, but the number of passengers using the line is so great that a daily service will soon be necessary. The new air line has been nicknamed "the husbands' line," because it is chiefly used by husbands visiting their families at Rimini.

1 1 1

Italy has decided to celebrate the fiftieth anniversary of Edison's invention of the electric filament lamp by holding on Oct. 21 a "settimana della luce," or a week of light. Plans have been made to illuminate all the important monuments in the various cities of Italy in honor of the great inventor.
